

Jamie Morris

Regional Head, Asset Management

Founding member of the regional team with over 15 years' experience in the energy industry pertaining to integrity and performance assessment of ageing plants, across the Power & Water, Oil & Gas, Nuclear and Industrial Sectors.

Jamie holds an Honours Degree in Mechanical Engineering and joined Doosan Babcock in 2005 and has operated globally on a variety of projects and initiatives across various sectors. Developing a breadth of experience in engineering assessment, lifetime extension and interface management with the wider Doosan group for product support.

Currently he is responsible for the Asset Management activities across the region, having transferred from Doosan Babcock's European business in 2014. Successes include supporting the O&M team at one of the largest Power & Water Plants in the UAE as an Embedded Engineer, to drive the prioritisation of defects and support the optimisation of their maintenance strategy.
