

Alya Al Naqbi

Interface Manager

Alya Al Naqbi is an Interface Manager, focused on the execution and delivery of the Sharjah Waste to Energy Power Plant, the first waste-to-energy plant in the UAE. This role involves: attaining desired business and manpower performance during all phases of the project within budget; demonstrating innovation in technology definition; achieving world-class levels of QHSE; and coordinating complex interfaces in construction, government authorities and lenders' technical advisors.

Alya has diverse experience across oil and gas, barges construction, renewable projects bidding, and construction. In addition to volunteering in the Litre of Light campaign in August 2017 to assemble and install 200 solar lights in a village located in Bhubaneswar – India. Alya has been an active member of the Women Union Association in Sharjah since 2004, and was recognized by the association for her vital contribution for international Women's Day in 2016. In addition, she is also active on social issues, such as volunteering as an organizer for a Children of Divorce Conference and an emotional divorce conference. She was also a volunteer for the Litre of Light campaign in August 2017 to assemble and install 200 solar lights in a village located in Bhubaneswar, India.
