OFFICIAL SUSTAINABLE ENERGY PARTNER

## MD&CEO Message

Over the past few decades, Dubai has made significant progress to become a global hub for trade, tourism, and a green economy, as well as one of the world's most inspiring, successful, and attractive cities for investments in various markets. This is due to the vision and directives of His Highness Sheikh Mohammed bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE and Ruler of Dubai; and the follow-up of His Highness Sheikh Hamdan bin Mohammed bin Rashid Al Maktoum, Crown Prince of Dubai and Chairman of the Executive Council of Dubai. At DEWA, we work in line with the UAE Centennial 2071, the Eight Principles of Dubai, the 50-Year Charter, the Dubai Clean Energy Strategy 2050, and other government strategies that aim to ensure the happiness of citizens, residents, and visitors.

To meet the increasing demand for electricity and water in Dubai, DEWA continues to develop pioneering infrastructure projects to provide excellent services for over a million customers in Dubai according to the highest standards of availability, reliability, safety and efficiency. This is supported by assets worth AED 190 billion owned by DEWA and its subsidiaries. DEWA's installed capacity has reached 13,200MW of electricity and 490 million imperial gallons of desalinated water per day (MIGD).

In line with its vision to become a globally leading sustainable innovative corporation, DEWA supports Dubai's progress in leading the future by reworking the traditional concepts of work mechanisms to suit the rapid global changes and strengthen Dubai's position as an incubator for creativity and a beacon of innovation. The secret of DEWA's success lies in applying the principles and practices of excellence across all its operations and activities as well as in strategic planning, in addition to including them within its corporate culture. DEWA has established best practices of its own to become a global role model for its key performance indicators. DEWA's dedicated workforce has made unprecedented achievements locally and globally. For example, the UAE, represented by DEWA, has maintained its first global ranking for the third year in a row, with scores of 100% in all Getting Electricity indicators in the World Bank's Doing Business 2020 report. DEWA has reduced its customer minutes lost to 1.66 minutes, compared with 15 minutes recorded by leading utilities in the European Union and the USA. DEWA has further reduced its power transmission and distribution network losses to 3.3%, compared to 6-7% in Europe and the USA. DEWA's water network losses have decreased to 5.1%, compared to 15% in North America, making it one of the lowest in the world. DEWA improved the sustainability of its water and power infrastructure to increase fuel consumption efficiency up to 90%, and generation efficiency by 33.41% between 2006 and 2020. DEWA won the European Foundation for Quality Management (EFQM) Global Award in 2020. It is the first and only organisation outside Europe to have done so, and on its first application as well. From 2015 until the first half of 2021, DEWA received 348 awards local, regional, and international awards.

While we feel proud of DEWA's achievements, we will continue developing unique experiences that enhance the happiness of all stakeholders and contribute to making Dubai the happiest and smartest city in the world. We will work to innovate proactive solutions for the challenges over the next 50 years to achieve the vision of the wise leadership to make the UAE the world's leading nation by its Centennial in 2071.

**HE Saeed Mohammed Al Tayer**

**MD & CEO of DEWA.**

## رسالة معالي العضو المنتدب الرئيس التنفيذي

على مدى عقود قليلة، نجحت دبي في تحقيق نقلة نوعية لتصبح مركزاً عالمياً للمال والأعمال والسياحة والاقتصاد الأخضر، وإحدى أبرز مدن العالم وأكثرها إلهاماً ونجاحاً وجذباً للاستثمارات في مختلف المجالات، بفضل الرؤية الثقافية والتوجيهات السديدة لسيدني صاحب السمو الشيخ محمد بن راشد آل مكتوم، نائب رئيس الدولة رئيس مجلس الوزراء حاكم دبي رعاه الله، والمتابعة الفاعلة لسمو الشيخ حمدان بن محمد بن راشد آل مكتوم، ولي عهد دبي رئيس المجلس التنفيذي. وفي هيئة كهرباء ومياه دبي، نعمل في إطار "متوية الإمارات 2071"، و"المبادئ الثمانية للحكم والحكومة في دبي"، و"وثيقة الخمسين"، واستراتيجية دبي للطاقة النظيفة 2050، وغير ذلك من الاستراتيجيات الحكومية التي تهدف إلى تحقيق سعادة المواطنين والمقيمين والزائرين

ولتلبية الطلب المتزايد على الطاقة والمياه في دبي، تواصل الهيئة تطوير مشروعات رائدة للبنية التحتية لتوفير خدمات متميزة لأكثر من مليون متعامل في الإمارة وفق أعلى معايير التوافرية والاعتمادية والكفاءة والسلامة، مدعومة بأصول تبلغ قيمتها 190 مليار درهم تمتلكها الهيئة والشركات التابعة لها. وتبلغ القدرة الإنتاجية الإجمالية للهيئة من الكهرباء 13,200 ميغاوات، و490 مليون جالون من المياه المحلاة يومياً

وفي إطار رؤيتها كمؤسسة رائدة عالمياً مستدامة ومبتكرة، تسهم هيئة كهرباء ومياه دبي في الانتقال بدبي نحو زيادة المستقبل عبر إعادة صياغة المفاهيم التقليدية لآليات العمل لتتناسب مع التغيرات المتسارعة التي يشهدها العالم، وتعزيز مكانة دبي كحاضنة للإبداع ومنارة للابتكار، ويكمن سر نجاح الهيئة في تطبيق مبادئ وممارسات التميز في جميع عملياتها وأنشطتها وعمليات التخطيط الاستراتيجي، إضافة إلى تضمينها في ثقافة الهيئة المؤسسية. وقد أصبحت الهيئة نموذجاً يتخذ على مستوى العالم في أفضل الممارسات ومؤشرات الأداء الرئيسية. وحققت فرق العمل في الهيئة إنجازات غير مسبوقة على المستويين المحلي والعالمي، ومنها على سبيل المثال احتفاظ دولة الإمارات العربية المتحدة، ممثلة بهيئة كهرباء ومياه دبي، للعام الثالث على التوالي، بالمرتبة الأولى عالمياً في الحصول على الكهرباء، وبكافة مؤشرات المحور وبعلامة كاملة 100%، بحسب تقرير البنك الدولي لممارسة أنشطة الأعمال 2020. وسجلت الهيئة متوسط 1.66 دقيقة انقطاع لكل مشترك في العام، مقارنة مع 15 دقيقة لدى أكبر شركات الكهرباء في دول الاتحاد الأوروبي وأمريكا، وسجلت نسبة 3.3% في نسبة الفاقد في شبكات نقل وتوزيع الكهرباء مقارنة مع 6-7% في أوروبا والولايات المتحدة الأمريكية. وقد انخفضت نسبة الفاقد في شبكات المياه إلى 5.1% مقارنة مع 15% في أمريكا الشمالية، وهي من أدنى النسب على مستوى العالم. كما عملت الهيئة على تحسين البنية التحتية للطاقة والمياه بشكل مستدام، لترتفع كفاءة استهلاك الوقود إلى نحو 90%، وتحسنت كفاءة الإنتاج بنسبة 33.41% بين عامي 2006 و2020. وفي عام 2020، حصلت هيئة كهرباء ومياه دبي الجائزة العالمية من المؤسسة الأوروبية لإدارة الجودة، لتصبح أول مؤسسة خارج أوروبا تحصل على هذه الجائزة العالمية المرموقة، وأول مؤسسة في تاريخ الجائزة تحصل عليها من المرة الأولى للترشح. ومنذ 2015 وحتى النصف الأول من 2021، حصلت الهيئة 348 جائزة محلية وإقليمية وعالمية

وإذ نفخر بالإنجازات التي حققتها الهيئة، سنواصل العمل على ابتكار تجارب فريدة تعزز من سعادة جميع المعنيين وتساهم في أن تكون دبي المدينة الأذكى والأكثر سعادة في العالم، وسنعمل على ابتكار حلول استباقية لتحديات الخمسين عاماً المقبلة تضيفاً لرؤية القيادة الرشيدة بأن تكون دولة الإمارات أفضل دولة في العالم بحلول متوتيتها في العام 2071

معالي سعيد محمد الطاير

العضو المنتدب الرئيس التنفيذي لهيئة كهرباء ومياه دبي

## Our History

### DEWA, a continuous success story

Dubai Electricity and Water Authority (DEWA) was formed on 1 January 1992, by a decree issued by the late Sheikh Maktoum bin Rashid Al Maktoum to merge Dubai Electricity Company and Dubai Water Department, which had been operating independently before then. Both organisations were established by the late Sheikh Rashid bin Saeed Al Maktoum in 1959. Dubai Government fully supported the two organisations to provide Dubai's citizens and residents with their electricity and water needs.

Since its establishment, DEWA has made considerable achievements, to be ranked as one of the best utilities in the world. Today, DEWA provides its services to more than one million customers in Dubai, according to the highest standards of efficiency, reliability, and availability.

DEWA's results surpass major international utilities. DEWA reduced losses from electricity transmission and distribution networks in 2020 to 3.3% compared to 6-7% in Europe and the USA. Water network losses were reduced to 5.1% compared to around 15% in North America. DEWA also achieved the lowest customer minutes lost per year (CML) in the world of 1.66 CML compared to around 15 minutes in Europe.

The UAE, represented by DEWA, maintained its first place globally in Getting Electricity for the third consecutive year as per the World Bank's Doing Business 2020 report, which measures the ease of doing business in 190 economies worldwide.

## تاريخ الهيئة

### هيئة كهرباء ومياه دبي... قصة نجاح مستمرة

تم تأسيس هيئة كهرباء ومياه دبي في الأول من يناير 1992 بموجب مرسوم أصدره المغفور له بإذن الله الشيخ مكتوم بن راشد آل مكتوم، لدمج "شركة كهرباء دبي" و"دائرة مياه دبي" اللتين كانتا تعملان بشكل مستقل منذ تأسيسهما على يد المغفور له الشيخ راشد بن سعيد آل مكتوم طيب الله ثراه في العام 1959. وقد قدمت حكومة دبي الدعم الكامل للمؤسستين بهدف توفير ما يحتاج إليه المواطنون والمقيمون في دبي من خدمات الكهرباء والمياه

ومنذ تأسيسها، حققت هيئة كهرباء ومياه دبي إنجازات مهمة جعلتها واحدة من أفضل المؤسسات الخدمائية في العالم، تقدم خدماتها لأكثر من مليون متعامل في دبي وفق أعلى معايير الكفاءة والاعتمادية والتوافرية

وتتفوق نتائج الهيئة على نخبة المؤسسات الخدمائية العالمية، حيث انخفضت نسبة الفاقد في شبكات نقل وتوزيع الكهرباء في 2020 إلى 3.3% مقارنة مع 6-7% في أوروبا والولايات المتحدة الأمريكية، والفاقد من شبكات المياه إلى 5.1% مقارنة مع 15% في أمريكا الشمالية، كما حققت الهيئة أفضل النتائج العالمية في معدلات انقطاع الكهرباء لكل مشترك بمعدل 1.66 دقيقة انقطاع لكل مشترك سنوياً مقارنة مع 15 دقيقة لدى نخبة شركات الكهرباء في دول الاتحاد الأوروبي

وقد حافظت دولة الإمارات العربية المتحدة، ممثلة بهيئة كهرباء ومياه دبي، على المرتبة الأولى على مستوى العالم في الحصول على الكهرباء للعام الثالث على التوالي بحسب تقرير ممارسة أنشطة الأعمال 2020 الصادر عن البنك الدولي، والذي يقيس سهولة ممارسة الأعمال في 190 اقتصاداً حول العالم

GREEN HYDROGEN PROJECT

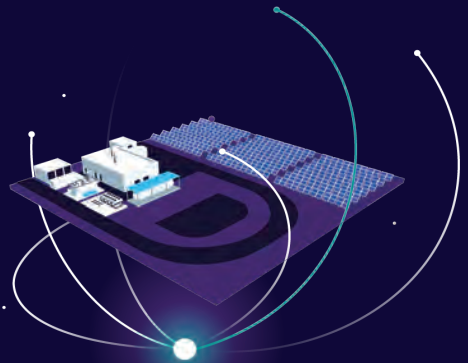

هيئة كهرباء ومياه دبي  
Dubai Electricity & Water Authority

# We unleash the power of hydrogen.

Siemens Energy, Dubai Electricity and Water Authority and Expo 2020 Dubai have collaborated to establish the region's first solar-powered green hydrogen plant at the Mohammed bin Rashid Al Maktoum Solar Park in Dubai. Hydrogen technologies are paving the way for the transition to a sustainable economy.

LET'S MAKE TOMORROW DIFFERENT TODAY

# Jeddahcables COMPANY

Jeddah Cables Company is a leading manufacturer and innovator of a wide range of Cable products. It is a proven preferred choice of Cable clients throughout the MENA region.

We are invested in Saudi Arabia in the most modern, best engineered industrial complex. Our manufacturing facilities include the process machinery from best worldwide companies in The field from highly technological countries such as: Germany, Finland, Japan, Switzerland, France, Italy, and USA, alongside the first vertical vulcanization (VCV) tower (130 m high) in The Kingdom to produce 400 KV Power Cables. This facility represents a global mark of distinction in the standard of quality for this product.

Our range of cable products includes Building wires, Control & Instrumentation cables, Low Voltage cables, Overhead lines, Medium voltage cables up to 36 kV and High/Extra High Voltage Cables up to 400 kV Serves almost every need of the construction, energy, signal, process, Transportation, communication, utilities and oil and gas sectors. In addition, we produce full Spectrum of plastics that includes PVC, XLPE-LV, XLPE-MV, and PE/BL As well we produce copper Rods that supply the domestic and the international market. In each of our diverse products,

Jeddah Cable Company's distinct advantage is portrayed in its relentless commitment to highest Standards of quality under the certification of ISO 9001-2008, which is complemented by its Superior technical expertise, specialized R&D programs and extensive manufacturing capabilities Allowing it to continue to refine and innovate the products that it brings to the market. With More than Two decades of experience in designing and manufacturing complex cable configurations We have successfully supplied leading utility customers like Saudi Electric Company (SEC), DEWA, KAHRAMA, ADDC, ARAMCO, SABIC, Jordanian Utility Companies (JEPCO, EDCO), FEWA and many more.

Thousand of millions worth of cable projects have been managed and completed successfully. With Sizeable resources, engineering experts and sophisticated technical knowledge, cables are guaranteed To be manufactured to the best international standards (IEC, BS..... etc).

# **EMPOWER**

**ENERGY  
SOLUTIONS**

## **STRATEGIC SPONSOR**

Emirates Central Cooling Systems Corporation - EMPOWER was established in 2003 as a joint venture between Dubai Electricity and Water Authority (DEWA) and Tecom Investments with an objective to enable real state industry to efficiently utilize energy resources by providing world class District Cooling Services (DCS).

From a modest beginning in 2004 with a single temporary plant serving DIFC (the finance district of Dubai) Empower has grown exponentially and is currently the largest District Cooling Services provider in the World serving more than 1.640 million refrigeration tons of cooling through plant rooms and networks spread all over the emirate of Dubai.

Empower has experience of building, owning, operating and maintaining large scale District Cooling plants utilizing potable water as well as treated sewage effluent (TSE) for its make-up water consumption and Thermal Energy Storage (TES) solutions. The operations and maintenance of all DCS plants are carried out by full time dedicated in-house teams of Empower.

Empower is not only providing its services to various new developments but has also extensive experience in successfully retrofitting buildings currently using conventional cooling systems to District Cooling Systems.

Being a service provider, Empower is also committed towards quality assurance and has implemented QHSEMS which is certified against ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018. Empower also considers Information Security as one of its prime responsibility and is one of the few entities that has been certified under ISO 27001:2013 for the entire organization.

# TRANSFORMATION

ON **YOUR TERMS**  
AND **YOUR TIMELINE**

## Wherever You Are, Wherever You Want to Be

**RISE with SAP** brings together the solutions and services you need for true business transformation – in one package – regardless of where your business stands now or where you transformation – in one package – regardless of where your business stands now or where you want it to go. It is SAP and an entire ecosystem of partners helping you chart your change on your terms and your timeline.

## Introducing **RISE with SAP**

If you want to succeed in today's world, you have to constantly adapt your business. Planning for this continual evolution requires that you not only be continual evolution requires that you not only be *ready* for change, but that you change the way work gets done.

This demands a redesign of your business plans and processes, and that demands new thinking and new technologies that unlock new ways of doing business.

### **SIMPLICITY BY THE BUNDLE**

A single offer on a single contract simplifies procurement and makes it easier to manage your vendors.

SAP S/4HANA Cloud – and integrated, extended solutions powering SAP Business Technology Platform – keep your organization agile and responsive.

The world's largest business network helps you collaborate across your company and across SAP's supplier, logistics, and asset intelligence networks.

### **OUTCOMES WITHOUT MAJOR INVESTMENTS**

Realize the value of your investment sooner, with up to 20% reduction in TCO over five years.\*

One platform breaks down silos and integrates data, intelligent technologies, and ERP software.

Savings, speed, and decision-making are all improved, all across your company.

### **HELP AT EVERY STEP**

SAP analyzes your processes against industry standards, offering you tailored recommendations of where to focus your efforts.

Tailored training and tools support you as you move from your current ERP environment.

22,000 SAP partners are ready to provide any additional support you need.

**RISE WITH SAP** | Business Transformation as a Service

\* RISE with SAP allows customers to realize the value of their investment sooner, with up to a 20% reduction in TCO over five years for SAP S/4HANA Cloud, private edition as compared to a traditional ERP deployment.

TCO reductions and timelines are modeled estimates from interviewed company data taken from the following IDC studies: ECC and SAP S/4HANA TCO study (Nov. 2020) and IDC SAP S/4HANA Business Value Study (March 2020). Timelines and estimates are intended for illustrative purposes only, and SAP makes no guarantees a © 2021 SAP SE or an SAP affiliate company. All rights reserved. s to actual results.

## Green Energy With Tesar cast resin transformers

Tesar manufactures special transformer for photovoltaic plants, wind farms and hydro power plants supporting the always increasing necessity of a sustainable energy generation.

Tesar transformers are characterized by extremely low loss levels reducing the loss of energy during transformation and thus supporting energy savings.

Tesar  
Main office: Loc. Chiaveretto 37/B, 52010 Subbiano (AR), Italy  
Dubai Office: DAFZA Building 5E, Block A, Office 118

## Building a New Tomorrow

You cannot answer tomorrow's challenges with today's capabilities. The future will seek those who can build big, build fast, build smart.

At L&T Construction, we have the experience and the expertise to turn challenge into opportunity.

We are ranked among the world's top international contractors. Our track record extends across the globe.

At project after project, we have demonstrated the ability to meet the most demanding requirements of speed, scale and complexity.

Team L&T has on board industry's finest talent. Skilled, trained and experienced, every member of the team is committed to leveraging advanced construction technology to energize a collective vision - building a new tomorrow.

# Creating a humane, sustainable, and resilient future for all

Wipro is a founding member of the  
Transform to NetZero initiative.

COOL POWER SPA	CHILE	NQ4	Cool Power SpA is an Engineering company dedicated to developing Renewable Energy projects with the aim of contributing to the decarbonisation of the national energy matrix and thus reducing the carbon emissions associated with energy production. In the area of thermal energy, we develop solar thermal energy projects based on flat solar collectors and fresnel collectors, thus covering temperatures from 60 °C to 400 °C for industrial applications. In the electrical area, we develop self-consumption photovoltaic projects with powers up to 300kW, PMGDs (Small Distributed Generation Means) projects for powers from 3MW to 9MW and other large-scale projects with powers up to 100MW.

Power Cables.

## COMPANY PROFILE:

Jeddah Cables Company is a leading manufacturer and innovator of a wide range of cable products. It is a proven preferred choice of Cable clients throughout the MENA region. We are invested in Saudi Arabia in the most modern, best engineered industrial complex. Our manufacturing facilities include the process machinery from best worldwide companies in the field from highly technological countries such as: Germany, Finland, Japan, Switzerland, France, Italy, and USA, alongside the first vertical vulcanization (VCV) tower (130 m high) in the Kingdom to produce 400 kV Power Cables. This facility represents a global mark of distinction in the standard of quality for this product. Our range of cable products includes Building wires, Control & Instrumentation cables, Low voltage cables, Overhead lines, Medium voltage cables up to 36 kV and High/Extra High Voltage Cables up to 400 kV. Serves almost every need of the construction, energy, signal, process, transportation, communication, utilities and oil and gas sectors. In addition, we produce full spectrum of plastics that includes PVC, XLPE-LV, XLPE-MV, and PE/BL. As well we produce copper rods that supply the domestic and the international market. In each of our diverse products, Jeddah Cable Company distinct advantage is portrayed in its relentless commitment to highest standards of quality under the certification of ISO 9001-2008, which is complemented by its superior technical expertise, specialized R&D programs and extensive manufacturing capabilities allowing it to continue to refine and innovate the products that it

brings to the market. With more than Two decades of experience in designing and manufacturing complex cable configurations we have successfully supplied leading utility customers like Saudi Electric Company (SEC), DEWA, KAHRAMA, ADDC, ARAMCO, SABIC, Jordanian Utility Companies (JEPCO , EDCO), FEWA and many more. Thousands of millions worth of cable projects have been managed and completed 154 successfully. With sizeable resources, engineering experts and sophisticated technical knowledge, cables are guaranteed to be manufactured to the best international standards (IEC, BS..... etc).

District Cooling Services Provider.

#### COMPANY PROFILE:

Emirates Central Cooling Systems Corporation (EMPOWER) was established in 2003 by a ruler's decree, as a joint venture between DEWA (Dubai Electricity and Water Authority) and TECOM (Dubai Technology and Media Free Zone). From a modest beginning in 2004 with a single temporary plant serving DIFC (the financial district of Dubai), Empower has grown exponentially with an impressive portfolio of major projects in place and is currently the world's largest District Cooling Services Provider. Through 84 plant rooms and more than 350km-long network, Empower operates on more than 1.640 million Refrigeration Tonnes and serves its district cooling services to more than 140,000 corporate and individual consumers in more than 1,252 buildings. Empower employs more than 845 professionals at its offices and plants in Dubai. Holding 76%+ market share of Dubai's district cooling sector, Empower is providing its services to a portfolio of world class projects such as Deira Water-front, Blue Waters, Jumeirah Group, Jumeirah Beach Residence, Dubai International Financial Centre, Business Bay, Dubai Healthcare City, Jumeirah Lake Towers, Palm Jumeirah, Discovery Gardens, Ibn Battuta Mall, Dubai Design District and Dubai Production City and many more to come. Empower is a partner of United Nations Environment Program (UNEP) and plays a vital role in UN-lead global initiatives, 'Cool Coalition' and 'District Energy in Cities.' Empower is also a member of international

bodies of district energy and HVAC industries such as ASHRAE and IDEA (International District Energy Association). Ahmad Bin Shafar, the CEO of Empower, is appointed as Board member of IDEA. Empower funded and supported ASHRAE to publish a historical District Cooling Guide in 2013, a guideline in designing District Cooling & Heating infrastructure and also funded the new edition of the guide. Also, IDEA selected Empower to host International District Cooling Conference, held in Dubai in December 2014, 2016 and 2018.

Smart Metering Solutions

## COMPANY PROFILE:

Diehl Metering provides smart metering solutions to utilities through the intelligent networking of various metering devices into larger data platforms. These solutions offer transparency for utili-

ties and municipalities, and enable considerably increased efficiency in reading, billing and service processes. Diehl Metering's customers are also able to benefit from real-time effects such as early recognition of leaks and the optimization of distribution networks through intelligent information regarding prompt adjustment of the offer to suit actual needs.

Diehl Metering operates in Dubai in collaboration with its local partner Afaq Al Khaleej.

Afaq Al Khaleej gained respectable recognition as a "ONE STOP" provider of products and services to power utilities around UAE and beyond. This is complemented by our successful prequalification with a majority of Power, Water, Oil and Gas, Telecom Utilities and Ministries, Government and Semi-Government Autonomous Authorities that have endorsed us as a quality provider of resources and services in the industry. This success is further strengthened with the support of our global supply chain partners and manufacturers.

### PRODUCTS:

Dairy, Juice and Foods Products

### COMPANY PROFILE:

Products grew steadily over the years which opened doors across the UAE & Oman. Our UAE dairy farm currently has over 16,500 cattle that operates around the clock with our production facility operating 24 hours. An award-winning UAE-based company, we serve more than one million customers per day, and in 2020 celebrated our 30th anniversary. Our products are easily recognizable as they bear the words Home Made in the UAE. Innovation is at the heart of everything we do. We introduced plastic milk bottles to the UAE in 1991 and were the first company to bring fresh juices to the GCC in 1995. As a leading dairy manufacturer in the UAE, we were the first company to introduce functional dairy products into the market. Al Rawabi plan to launch an environmentally friendly Biogas plant is done. Clean nature, care about environment, ecology, recycling, sustainability are Al Rawabi milestones. Al Rawabi farm as a first self-contained farm in UAE is a foundation for Al Rawabi Dairy company in the future. Al Rawabi currently produces 350,000 liters of dairy products and 150,000 liters of juice products per day. The Nation's Health is of paramount importance to us hence we ensure our products are fresh and always packed with health benefits. As Al Rawabi's dairy farm is located in close proximity to the dairy processing plant our products are delivered to your retail shelves within 24 hours. It's been an honour and a privilege to serve the nation for over 30 years. Our promise is to ensure the Nation's health.

al of Sheet Piles, Trench Boxes, Pipes, and Supporting System, etc.

## COMPANY PROFILE:

ArcelorMittal Projects is part of the ArcelorMittal Group – the world’s leading steel and mining company - and operates as a global one-stop shop for steel solutions. We provide complete, customized, and sustainable steel solutions and services via three specialized and project-related business lines: Foundation Solutions, Solar Projects, and Energy Projects. One of the Projects’ strategic local entities, Projects Middle East, has recently purchased the Hamriyah Pipe & Coating Mill to expand and optimize their product and service offer to the foundation and energy market. “The state-of-the-art Pipe & Coating Mill in Hamriyah enables us to produce and process high-quality steel tubes for the entire Middle East market locally. This helps us to serve our customers in an even more efficient and flexible way and to provide the most cost-effective solutions. Our products are backed with technical expertise and are compliant with International Standards. The Hamriyah Mill can produce steel pipes up to 30 meters with a thickness of 5 to 22 millimeters. The production facility features the latest state-of-the-art technology: Laser vision Seam Tracking / Adaptive Welding System, a new generation of highly reliable sensors, specifically designed for ‘Gap Control’ welding and inspection applications. The revolutionary technology ensures that the welding head is kept in the correct position and takes appropriate action when needed. This results in improved weld quality reduced rework of welds, increased welding speed, and overall better product quality. Besides welding the pipes, the Hamriyah mill also facilitates anti-corrosion coating on external and internal surfaces of the pipes. The coating facility is the cherry on the cake and enables Projects Middle East to offer local customers services that truly add value to their high demanding projects.

**COMPANY PROFILE:**

About Us:

Since 1995, we've been working around the clock to ensure that everyone has access to safe water while also encouraging all of our stakeholders to recognize the necessity of water reclamation and recycling. For the future, our goal is to build a rich collection of efficient water management and treatment solutions to address current water-related concerns.

One can spot CELAR installations and products in various industries and sectors, including marine, oil & gas, government, pharmaceuticals, and agriculture. We deliver wastewater treatment and water purification projects that are cost-effective, ingenious, and reliable, allowing our clients to serve their communities and end-users for many years.

Precision, efficiency, and trustworthiness have helped us become our customer's most dependable

partner for all water-related work. Our highly skilled specialists leverage contemporary technology to produce reliable, high-quality solutions that offer unrivaled operational and cost benefits.

It is our management's forward-thinking approach and visionary mindset that allow us to quickly develop or acquire water-treatment and purification technologies, giving our customers first-hand access that helps them grow their businesses exponentially.

Celar has established itself as a valued partner to the government, numerous industries, and individual customers across the Emirates and middle east as a whole, thanks to our dynamic knowledge and ever-expanding product line relating to complete water management solutions, industrial wastewater treatment processes, domestic and industrial water and wastewater treatment.

## PRODUCTS:

ENGINEERING & CONTRACTING AND MANUFACTURING & TRADING OF ELECTRICAL / MECHANICAL EQUIPMENTS.

## COMPANY PROFILE:

Meeting and exceeding market demands since first opening our UAE operation, Danway has succeeded in maintaining secure and sustainable growth over the last four decades transcending into a leading Engineering and Contracting enterprise in the Infrastructure, Industrial, Energy, Oil and Gas sector within the UAE and the Middle East.

Danway Electrical and Mechanical Engineering LLC, Danway LLC and Danway Emirates LLC which comprises the DANWAY Group of Companies has a long and successful track record of delivering expert engineering products and technical services across the project value chain. Today, the company operates as a fully owned subsidiary of AL NOWAIS Investments, a conglomerate established in the UAE that tenders diversified interests in power, water, oil and gas as well as industrial projects within the region.

From design development to commissioning and maintenance, Danway offers an integrated suite of services during the life cycle of the project across all sectors. With representation of diversified electrical and mechanical engineering products of international repute, Danway can ensure delivery of quality and reliable services as a single source solution with its unparalleled expertise in the execution of EPC projects.

Danway has headquarters in Dubai and offices in Abu Dhabi, Oman, Qatar, KSA, Bahrain & Togo. As part of its vision to be an internationally respected Engineering and Contracting Company offering comprehensive solutions in the EPC field, DANWAY is actively planning to extend its operations to other countries in the Middle East and Africa. To further consolidate its position, DANWAY has implemented ERP solutions from SAP and recently upgraded to SAP S/4HANA 2020 release, adopting industries best practices and creating transparency at all levels of the business.

As a multi-divisional corporation, we represent more than 100 world-renowned companies in the areas of electro-mechanical and instrumentation equipment supply and service.

Not only do Danway's highly qualified and knowledgeable teams ensure the highest standards of quality, we also provide comprehensive customer service and technical support after delivery. Danway personnel are continuously being provided with training, allowing them to make the most of the latest technological advances in order to overcome the toughest of challenges.

Danway has always been recognized for its clear vision, professionalism, dedicated team effort and strong partnerships we have fostered over the years. Furthermore, we are respected for our high principles, our reliability, our performance and our second-to- none after sales service. Through our fully integrated service support centers and value added philosophy, we have built a strong and solid customer base, resulting in a long and prestigious list of successfully completed projects.

DANWAY operates in accordance with standards ISO 9001:2015, ISO 14001: 2015 and ISO 45001: 2018 and the company is committed to productive efficiency coupled with quality assurance, workplace health, safety and protection of the environment.

## COMPANY PROFILE:

The ETS Group comprises a diverse portfolio of businesses and products founded in the electrical distribution and energy sectors. Our activities cover three distinct areas of electrical product equipment trading, manufacturing, service and maintenance. The product portfolio includes premier brands such as Emirates Transformer & Switchgear, IEO Transformatoren and HS Switchgear, all leaders in their respective fields which clearly demonstrates our groups high-end philosophy, capability and service levels.

We produce a comprehensive range of distribution/power liquid and cast resin transformers, LV/MV AIS switchgear and LED lighting with production facilities in Europe, Middle East and Africa.

The trading division has relationships with major global brands of electrical equipment and LED lighting solutions to enhance and complement our own product portfolio.

The ETS Group supplies clients with quality products and service for all their secondary distribution electrical distribution equipment needs, and more. Our team of industry and technical experts develop practical and cost effective solutions which are fit for purpose to meet and exceed today's exacting needs.

Intel IOT And AI Solutions , Solutions to check Indoor Air Quality, Smart Building Management , Facility management Solutions and Lenovo Vpro Devices.

## COMPANY PROFILE:

Guided by our founder's philosophy and defined by our varied portfolio, unique strengths and skills, we have grown from strength to strength over the last four decades. Through strategic diversification, we aim to create a future where everyone has access to the best that the world can offer.

We believe in the significance of long-term partnerships – precisely why our brands, customers, associates and employees have been our long-standing allies and will remain with us in our march towards a bigger and brighter tomorrow.

From being a brick and mortar retailer, Jumbo Retail has grown into an OmniChannel Retailer providing the most seamless shopping experience, be it online or in-store.

Our evolution is embodied in steady and significant growth that Jumbo OmniChannel Retail has seen in the last 4 decades. Since 1974, Jumbo has continued to be UAE's most trusted retailer with an omni-

channel retail experience. The concept offers superior experience and customized offerings on latest technology products and services, online as well as offline.

Jumbo OmniChannel Retail offers the best in mobile phones, laptops, TVs, home theatres, cameras, gaming, lifestyle products, accessories and telecom services. As a strategic partner for high end premium brands like SONY and DYSON, Jumbo OmniChannel Retail manages brand boutiques too. It also operates DU franchise stores across UAE. Jumbo offers after-sales service from Jumbo Serve (the largest service centre in the UAE) and installation support as well as smart home services from Jumbo UnwiredCrew. We also offer other value added services such as Jumbo Salama and Jumbo Exchange.

Jumbo Enterprise Division caters to large enterprise and government accounts for their end to end IT, manpower and Facility management requirements.

### PRODUCTS:

SUNTEN can manufacture various types of cast resin transformers, with capacity up to 31500kVA and voltage level 35kV and below. SUNTEN has designed, produced and supplied more than 2000 varieties and specifications of cast resin transformers. Safe, no pollution and hardly inflammable. The transformer can be installed in load center. Maintenance free, easy installation and low Operation cost. Highly moisture-proof. The transformer can operate normally under 100% relative humidity and can be switched on without pre-drying even after a longer period of service interruption. Low partial discharge, low losses, low noise level, and ideal dissipation of heat. By means of forced air cooling system, the transformer can be operated up to 150% of its rated output for certain time. Precise temperature protection and surveillance system assures safe and reliable service of transformer.

### COMPANY PROFILE:

SUNTEN ELECTRIC Equipment Co.,Ltd was founded in 1988. With development for over thirty years, SUNTEN has become a famous supplier of Transmission and Distribution equipment for domestic and abroad urban electricity networks, a leading company in the worldwide dry type transformer industry. SUNTEN is a specialized manufacturer of high quality equipment of urban electricity networks such as dry type transformer, prefabricated substation, pad-mounted transformer, MV &LV switchgear, dry type reactor, electrical power equipment.

### PRODUCTS:

Engineered pumps

### COMPANY PROFILE:

Termomeccanica Pompe (TMP), a company whose history dates back as far as 1912, ranks today amongst the leading manufacturers and service providers of engineered pumps solutions for application in the Power Generation, Desalination, Water Handling and Oil & Gas sectors. Termomeccanica's distinctiveness stems from its flexibility and adaptability, which translates into a unique capacity to adjust to market changes and cater to customers' needs. In fact, the entire company revolves around developing solutions tailored to customers specific project requirements, whether they be related to products or after-sales services.

One of Termomeccanica Pompe's main key success factors has been its capacity to follow an intense internationalization and localization process, leading to the opening of local branches & subsidiaries in key areas for both its sales and operations, including procurement, production and service activities. TMP has recently opened a service center in Abu Dhabi, with the aim to better cater to local customers' and end users' needs related to the rotating equipment of their plants. Termomeccanica Pumps Services LLC workshop has been set to perform all main repair & maintenance activities on rotating machines according to Termomeccanica's HQ standards. The company also offers field services for such equipment, namely supervision of installation & commissioning, main overhauls, troubleshooting / mechanical analysis and monitoring.

### PRODUCTS:

- UV-C Idrosteril®: eliminates pathogenic microorganisms in tap, production and processed water (such as well water, tanks, marine platforms, ships, marine water, Mussel farming water) without altering its colour, odour and/or taste;
- 
- UV-C Aersteril: prevents disease transmission caused by air-floating microorganisms (in schools, gyms, offices, etc) and eliminates microorganisms which deteriorate meat, dairy products, cold cuts, fish, poultry, fruits (beverage and food industries);
- 
- UV-C Ray Killer for surgical masks, clinic folders/papers, glasses, jewelry, banknotes (etc.) sterilization.

### COMPANY PROFILE:

A.D.P Idrosteril® has been potabilizing water and sterilizing air since 1951 with the safe, effective and ecological ultraviolet rays technology.

Reliability and high quality make UV-C Idrosteril® and UV-C Aersteril the most advanced technology for environmental and food sanitation - with their application being completely harmless to humans. UV-C's radiation wavelength (100-280nm) has a strong germicidal effect and it's also known for its ability to break DNA sequences of viruses, bacteria, fungus and spores. UV-C quickly destroys and inactivates microorganisms without the use of chemicals.

After 70 years of intense research, today A.D.P. Idrosteril® conceives, designs and manufactures:

- UV-C Idrosteril® devices that eliminate pathogenic microorganisms in tap, production and processed water (such as well water, tanks, marine platforms, ships, marine water, mussel farming water) without altering its colour, odour and/or taste;
- 
- UV-C Aersteril machines that prevent disease transmission caused by air-floating microorganisms (in schools, gyms, offices, etc) and that eliminate microorganisms which deteriorate meat, dairy products, cold cuts, fish, poultry, fruits (beverage and food industries);
- 
- UV-C Ray Killer for surgical masks, clinic folders/papers, glasses, jewelry, banknotes (etc.) sterilization.

ITALIAN  
WATER  
FILTER

## PRODUCTS:

Filters and Equipment for Water Treatment

## COMPANY PROFILE:

Born in 1962 from the intuition of founder Joseph Ermirio, who was one of the first in Italy to fully perceive the importance of water.

Thanks to almost sixty years' experience in the world of water treatment and to our qualified in-house technical department, our Group is able – with the wide range of products in our catalogue (most of which we manufacture) or through the design/manufacture of customised plants – to offer a complete response to all primary water treatment requirements for both domestic and industrial use.

Akuaril works through three divisions:

1. WATER FILTERS: We manufacture and market a complete range of products for domestic, civil and industrial use:

1. anti-sand/sewage equipment and filters
2. anti-scale filters and devices
3. activated carbon filters and equipment for removing pollutants such as heavy metals and chemicals
4. filters and equipment to purify and make water drinkable (reverse osmosis).

2. AKUABON – (Purifier and refrigerators):

We supply water-coolers complete with pre-filtration for installation both above and below the sink, which can produce chilled, sparkling and still water at room temperature.

3. POLO POOL:

We design and manufacture a wide range of specific items for pool water treatment such as filters, pumps, skimmers. We deal with innovative sterilisation systems with ultra-violet germicidal lamps. Our offer covers a very wide range of users, from small above-ground pools to Olympic-sized pools and water parks.

Akuaril, with its brands covering the three divisions, is present in Italy through a qualified network of sales agents and a widespread network of distributors throughout the country. For some years now it has been exploring new markets with growing satisfaction.

### PRODUCTS:

Our product range is ideal for water and wastewater applications as well as industrial such as oil & gas, petrochemical, food industry, mining sector, sea water intake stations and many more. We also custom design and build filtration systems and batteries to suit the site needs and conditions. We match the most appropriate materials to the application, such as stainless steel, duplex, super duplex, 254SMO, GRP, PP and PVDF.

### COMPANY PROFILE:

Alfa Water Srl is an Italian company with a strong experience in the design and manufacturing of all types of manual and automatic screens filters. We invested our collective experience in water filtration to produce world-class solutions and products in stainless steel, super alloys and advanced materials.

Beside our strong knowledge in water filtration, our designs and manufactures a wide range of screen filters for the removal of suspended solids from water. Research&Development with support provided by modern technologies of solid modeling and the use of selected materials plays a key role in our Company philosophy.

Odor Control & Air Cleaning System (Bio Filter, Scrubber, Carbon Filter, RTO, Degasifier, Demister, Tanks Cover, Ducting, Damper, Ventilation Fan, Chemical Pump & Gas Analyzer)

## COMPANY PROFILE:

Since 2008, AmerAir Intl supplies Odor Control and Air Cleaning Systems without any bias toward any single technology. We supply study, engineering, design, manufacturing, installation, and operation and maintenance. AmerAir Intl extensive application experience and engineering capabilities result in the best solution without any preference to the technology utilized. Our own manufacturing ensures the Highest Quality Products.

As a major supplier of Biological Filtration, Chemical Scrubbing, Carbon Adsorption and Thermal Oxidation, we serve various industries;

Municipal Wastewater and Solid Waste: Odor Control Systems (Bio Trickling Filter, Chemical Scrubber and Carbon Filter)

Industrial Wastewater: VOCs Removal Systems (RTO and Carbon Filter)

Water Treatment: Emergency Chlorine Scrubber

Well Water RO and Wastewater: Degasifier (H<sub>2</sub>S, NH<sub>3</sub>, VOCs)

Mineral Water: CO<sub>2</sub> Breather

We represent major top suppliers;

Pumps (Munsch GmbH): Plastic pumps for chemicals (NaOCl, HCl, FeCl<sub>3</sub>) and Sea Water

Fans (Mietzsch GmbH): Plastic fans for ventilation of corrosive gases (H<sub>2</sub>S, NH<sub>3</sub>, Cl<sub>2</sub>)

Covers (AT Covers srl): Aluminium covers for tanks, chambers and channels

Gas Analyzers (Leopold Siegrist GmbH): Measuring instruments for gases (H<sub>2</sub>S, NH<sub>3</sub>, Cl<sub>2</sub>, VOCs)

Also, the below products is fabricated in our UAE facility;  
Demister, GRP Tanks, GRP Fittings (Duct, Tee and Elbows), Dampers (Manual, Non-return and Actuated), Control Panel, Gas Monitoring Unit

We provide Field Service as well as Training for the operators. Our PPM yearly contract supports our clients with regularly inspect or maintain their systems. Spare parts sales and service of the peripheral equipment is a commitment to our valued customers.

## COMPANY PROFILE:

ATI is a leading provider and innovator of engineered, analytical sensor monitoring solutions and data insights for water and gas applications. Trusted globally within the utilities, food & drink, industrial, petrochemical, healthcare and leisure sectors, ATi pioneers the development and deployment of bespoke, industry-leading solutions, whilst delivering first-class customer support.

Our water quality solutions deliver real-time, continuous monitoring within potable, process and wastewater applications, ensuring optimal control and efficient delivery of high-quality water. Our range of flexible solutions extract deeper insights, safeguarding water quality.

As global leaders in smart water quality monitoring, ATi developed the industry's first, revolutionary range of Smart Network water quality monitors, including MetriNet, NephNet, SiteBox and ChlorNet. This smart sensor technology offers sustainable solutions, helping to drive down customer complaints and result in pro-active network management to safeguard water quality and improve compliance.

At the forefront of the Smart Network range is the WRAS approved MetriNet, an ultra low-powered, modular system for monitoring water quality and collecting data. Its modular nature, suitable for a variety of applications, enables users to assemble a monitoring package to fit individual site requirements. At the heart of the system are the industry-leading smart water quality M-Node sensors, available in 16 different parameters, and are purpose designed for a simple 'click-connect' flowcell arrangement.

Website: <https://www.andritz.com/pumps>

Contact Person: Mr. Ali Qundil

**PRODUCTS:**

For decades, the reliability of ANDRITZ centrifugal pumps has made them the first choice for applications in water resources management. The standard components of ANDRITZ pumps guarantee high availability, allow the use of time-tested components, and minimize the number of spare parts to be kept in stock. ANDRITZ pumps cover the requirements of both municipal and industrial waste water transport. As one of a small number of pump manufacturers, we offer both dry- and wet-mounted sewage pumps. In order to cover the demand for freshwater as drinking and process water, also in very dry regions and in areas with a high population density, the plentiful supply of seawater should be harnessed. ANDRITZ meets the challenges that desalination applications set for plant components.

**COMPANY PROFILE:**

ANDRITZ offers premium pumping technology from a single source – from development work, model tests, engineering design, manufacture and project management, to after-sales service and training – tailored to your requests and needs. In addition, ANDRITZ is the world's leading separation specialist, with the deepest knowledge, broadest technical resources, and most comprehensive service solutions.

SOC - SECURITY OPERATION CENTER Atlantica Digital has created a Next Generation Security Operation Center (SOC) able to protect and provide Remote Workforce Protection services to defend remote environments, 24 hour monitoring on servers, workstations, laptops, mobile devices, OT, etc. SMART METERING SOLUTIONS The Smart Metering business unit has allowed Atlantica to gain a leadership position in Italy and represents the heart of Atlantica's Utility offering, with a dedicated structure made up of about 60 highly specialized employees, Atlantica have operated in the management of smart meters for more than 10 years, with approximately 13 million meters managed in the water, electricity and gas sector in Italy and in Europe.

**COMPANY PROFILE:**

Atlantica Digital has been operating for over 30 years, in Italy and abroad, in the Telco, Industry, Defense, Transport, Utilities and Public Administration areas, in the field of IT infrastructure dedicated to companies, markets, installations and after-sales support guarantees for enterprise-class IT systems, and works in strategic IT consulting and in the design of storage infrastructure for data storage and management. The company's core business is the creation of systems for high availability and security of digital identity in business environments, also developing considerable expertise in the field of data center virtualization for the consolidation of information systems.

Leader in the design and implementation of mission-critical systems, it offers solutions for Cloud Computing, Data Business Analytics, support for data center virtualization and digital identity security management.

Atlantica Digital competes with its products and services, based on flexibility, solutions and projects on digital innovation, system integration and managed services and specific solutions on Smart Metering, Cyber Security, Big Data, IoT, etc..

Smart Metering represents Atlantica's proprietary solution represents the heart of Atlantica's Utility offering, and is one of the company's distinctive elements, which answers market needs for an advanced, flexible and integrated Automated Meter Reading System, in line with both the current legislation and the latest technological developments.

The availability of a dedicated structure made up of about 60 highly specialized employees, both in terms of technological skills and business processes, that have operated in the sector for more than 10 years, has allowed Atlantica to gain a leadership position in Italy, with approximately 7 million meters managed, and in Europe with 4.5 million meters in the gas sector alone.

Atlantica addresses the market with an integrated approach to the problems of data security and logical infrastructure, offering consulting and training services, vulnerability management, identity governance, SIEM and data security. In addition to the vast portfolio of services offered, there is a proprietary Security Access and Monitoring Management product, (SAM) which finds a specific application in the context of the regulatory adjustments provided by the GDPR. Atlantica designs and implements Cyber Security solutions, adopting the most innovative technologies on the market and integrating them with decades of experience in the field.

Atlantica Digital has created a Next Generation Security Operation Center (SOC) able to protect and provide Remote Workforce Protection services to defend remote environments, 24 hour monitoring on servers, workstations, laptops, mobile devices, OT, etc..

**COMPANY PROFILE:**

Besomi Electronics group was founded in Jordan early 1986, with many years of experience in supplying electronic components, sub-assemblies, solutions and large varieties of products to our local and international markets. The geographical location of Dubai, United Arab Emirates and the economic development attracted a lot of businesses, not only from the laws and regulations available to investors but also the unlimited support by the government. Therefore in 1998 the company decided to move the Head Office to Dubai in order to keep pace with the development and take our business to a higher level. The result of a safe and long-term investment environment that enabled the group to partner with prominent global clients in various sectors such as Education, Research / Development, Automation, Industrial, Power Generation, Tele-communications, civil defense, Military and more. In 2020, the group reached another milestone where it expands to Cairo, Egypt to cover North African markets, and just recently in 2021 we started our new journey in another continent, Sydney Australia. Besomi Electronics Group is accredited to ISO 9001:2015.

## OUR PRODUCTS

We supply a huge variety of electronic and electrical components, from over 10,000 different in Stock SKUs to millions of other components we procure on daily basis from trusted partners that are located across the seven continents. Our main focus in our distributorships and partnerships with global manufacturers is concentrated in Robotics, 3D printing, smart home automation, manufacturing lines automation and AI.

## OUR MISSION

Provide best in class service to our clients through sourcing high quality engineering spare parts from leading manufacturers across the world in a timely manner, while excelling in developing solutions that help engineers and the industry to move forward in creating and crafting their products.

## OUR VISION

Be an inspiration hub to engineers all over the world to create and elevate in their projects which can drive a positive change to the world.

Odor Control & Air Emissions Systems and Services

### COMPANY PROFILE:

BioAir Solutions, LLC is the world's premier designer and supplier of biological odour control systems. BioAir provides a wide range of high-rate biological odour treatment solutions, with a team of experienced engineers who will analyze the odours at your facility; develop a custom solution; provide the most efficient, cost-effective odour control system possible; and provide best-in-class local after-market support.

After a major investment in research, design, and engineering, BioAir has patented its EcoFilter® process. All EcoFilter systems utilize BioAir's EcoBase® synthetic media, which continues to set new industry standards in performance and loading rates in the Middle East and around the world.

BioAir has the experience and expertise to perform on-site odour studies, field surveys and system design to solve collection and municipal odour problems. BioAir recognizes the need for its advanced odour control technologies in the Middle East, and since expanding to UAE the company has designed, fabricated, supplied, and even installed equipment in Ras Al Khaimah, Sharjah, Abu Dhabi, Dubai and Ajman in the UAE, and Doha, Qatar.

Please visit ([www.bioairsolutions.com](http://www.bioairsolutions.com)) to learn more about BioAir and its biological odour control processes.

### PRODUCTS:

HYBrid ACtivated Sludge Process (HYBACS™) & High rate Multimedia Filtration process (FilterClear™).

### COMPANY PROFILE:

Bluewater Bio is an award winning global specialist in technologies for cost-effective water & wastewater treatment. Headquartered in London, Bluewater Bio's range of best in class technologies are deployed at over 100 sites globally.

With two fully commercialized technologies proven at utility scale, complemented by an active New Product Development pipeline, Bluewater Bio's capabilities include:

- HYBACS (enhanced activated sludge process)
- FilterClear (high throughput multi-media filtration)
- Operational & Maintenance services (supporting a population equivalent of c. 1 million)
- World Class R&D team, based at Cranfield University, UK

Bluewater Bio's growing technology portfolio is focused primarily on the rapid upgrading, optimiza-

tion and monitoring of water and wastewater treatment plants. The company has a particular emphasis on reducing:

- Capital, operational and compliance costs
- Energy & chemical consumption
- Physical & environmental footprint
- Greenhouse gas emissions
- Construction and commissioning times

Bluewater Bio not only develops its own innovations but also scours adjacent markets for complementary IP, license opportunities and partnerships.

Through this aggregation strategy, Bluewater Bio aims to be the natural choice for cost-effective treatment, re-use and monitoring provision across the water, wastewater and process industries.

They provide a comprehensive range of products and services, including design, engineering, installation, and maintenance of the charging stations. CATEC Mobility specializes in providing turnkey solutions for industrial projects of any size, including intelligent EV charging network solutions to support the ever-growing need for sustainable power sources. The charging stations are compatible with all types of electric cars, including Tesla, Nissan Leaf, Jaguar I-Pace, BMW i-series, and Renault Zoe. Smart Waste Management CATEC Green solutions are a component of Smart Cities and IoT initiatives. CATEC Green aims to revolutionize the waste management industry by providing end-to-end solutions and cutting-edge products while ensuring operational excellence. CATEC Green provides integrated platforms that use software and hardware advancements, and it collaborates with waste management companies, local governments, and municipalities to create a more sustainable and digital process management. CATEC Green is a certified reseller for Evreka. Evreka is a leading SaaS company that provides the most comprehensive intelligent solution designed for the entire category of waste management across the globe.

## COMPANY PROFILE:

CATEC: The Leading Digital Solutions Provider for the MENA Region and Beyond

CATEC is a UAE-based firm that specializes in digital solutions. The business has three core functions; Digital Business Transformation, Electric Vehicle Charging Solutions, and Smart Waste Management. The company's goal is to provide a unique mix of integrated solutions that will simultaneously deliver value, efficiency, and innovation. The company was established in 2005 and has grown to become UAE's premier digital solution provider. The company is proud to have served clients from various industries, including retail, manufacturing, and healthcare, in the Middle East and beyond.

CEO Rami Abu Haya states, "Our work spans continents and industries, but one thing stays common, the passion we share with our clients to merge customer centricity with good business." The company's mission focuses on the relationship with its customers.

CATEC aims to become a Global Growth Company to uplift the people they work with by offering them complete digital solutions. In addition, the company aims to play a vital role in shaping the future of cities and countries throughout the world.

As a regional leader, CATEC is committed to providing customer-centric innovation services that make it easy to implement complex technology projects with speed and agility.

## COMPANY PROFILE:

CEPCO is one of the leading general contractors on turnkey basis for civil and electrical projects in Saudi Arabia, Dubai and other GCC Countries. Mainly focused on the field of cable systems and substation construction (13.8 up to 400 kV).

With More than 44 years of experience in the industry, we are qualified turnkey general contractors working with the Saudi electric company and others with office in the western, eastern, southern, and central regions in Saudi Arabia, and Dubai Electricity and Water Authority in Dubai.

CEPCO also founded PTE (Power Transmission & Telecommunications Equipment) Co. in Jeddah, with "to be the leading contender in Power Transmission Equipment manufacturing market of GCC".

We are committed to providing innovative electro-mechanical and civil construction services to our customers in both the water and energy sectors; while working together with business partners to provide our stakeholders with the technical problems solving their businesses need. Since we started, we have built up expertise in design manufacturing & installation of various HV/EHV Power Transmission Equipment. We offer professionals services and prioritize our availability as per requirements of our customers. It is important that we are always there for our customers, wherever they are.

We are honored to say that we always deliver within agreed time frame & prices. Though personal relationships, accessibility, and commitment to customers, we are always able to provide best design solutions as per project requirements.

Contact Person: Prof. Mirta Baiamonte

### PRODUCTS:

High technology safety road

### COMPANY PROFILE:

Cms byPaver spa, in its 50 years of life has had a constant vocation: Innovating and improving in the field of prefabrication through exclusive, original products, the result of continuous research. Innovating means working every day to improve and that is why new technologies are developed and integrated every day to anticipate customer needs. Paver transforms ideas into concrete solutions while maintaining the necessary standards to differentiate itself in an extremely demanding national and international market. Cms by Paver is now one of the main production complexes in the field of prefabricated concrete for construction and street furniture. In its 55 years of life it has had a constant development up to the current structure, which sees production divided into four dedicated plants, two in Piacenza, one in Ferrara and one in Pistoia, while abroad it is present in Spain and Romania.

This production structure allows us to be present in a large part of the country by containing transport costs, the incidence of which for these types of products is generally high. The company philosophy of always putting customer needs at the center has led the company to operate in various market sectors by developing many patents still in force. Among the various fields of application, an important role is occupied by the prefabricated structures dedicated to traffic in which Paver operates with the specific brand.

**PRODUCTS:**

Water and Wastewater treatment.

**COMPANY PROFILE:**

Concorde - Corodex Group (CCG), a multi-disciplinary company established in 1974, has evolved to become the largest group to offer a diverse portfolio of products and services as a complete kit of water purification, wastewater treatment & environmental services, fire protection, firefighting equipment, vehicle manufacturing, marine & industrial chemical cleaning and speciality gases.

CCG's core values have been the cornerstone of what defines us and what we stand for. All business units of Concorde - Corodex Group are registered companies with Quality, Environment, Occupational Health and Safety Management Systems (QHSEMS) in compliance with International Standards such as ISO 9001:2008, ISO 14001:2004 and OHSAS 18001:2007. We have listed some establishments that will be the part of CCG stand at WETEX - Expo 2020 Edition.

1. CorodexTrading offers total water solutions and has dramatically grown as the Middle East's pioneer and the United Arab Emirates' largest company offering everything water-related. Corodex Trading provides total water solutions by delivering superior services that meet our customer's needs through a wide range of water treatment systems & equipment, sewerage & municipal equipment, laboratory and process instrumentation equipment and chemical treatment solutions to different systems (cooling water, chilled water, boiler water, domestic water, RO water and wastewater). We also undertake the projects such as cleaning of cooling water pipes, disinfection services with a complete supply of temporary equipment required (pumps and filters), manpower etc...
2. Corodex Industries has been a pioneer in engineering, manufacturing, assembly and fabrication of various water purification and wastewater treatment equipment. Corodex Industries was one of the first companies in the Middle East to offer water treatment services along with extensive research and development focused on developing the necessary technologies in water purification systems and wastewater treatment systems and odor control systems.
3. Corodex Electromechanic, part of CCG, has been executing several prestigious electro-mechanical projects in the UAE and other middle east countries, specializing in the fluid transmission system, vacuum sewer and sanitation systems, one of our renowned projects is the design, installation, commissioning, operation, and maintenance of the vacuum sewerage system for the Palm Jumeirah - the biggest vacuum station in the world.

4. EfloChem offers customized chemical solutions that combine product technology and engineering know-how, wealthy experience and expertise of over four decades, regional on-site technical support, propriety product formulations and on-time delivery. Eflochem offers a wide array of water treatment chemicals in the MENA region.

Our water treatment chemical offering is listed below:

- Flushing & cleaning of chilled/condenser water systems, district cooling networks & domestic water pipelines.
- Disinfection of tanks and potable water systems
- Hydro-testing of tanks and water networks
- Chemical cleaning of boilers/condensers
- Lake treatment
- Dosing Systems world.

#### **PRODUCTS:**

Developer of photovoltaic projects.

#### **COMPANY PROFILE:**

Cool Power SpA is an Engineering company dedicated to developing Renewable Energy projects with the aim of contributing to the decarbonisation of the national energy matrix and thus reducing the carbon emissions associated with energy production. In the area of thermal energy, we develop solar thermal energy projects based on flat solar collectors and fresnel collectors, thus covering temperatures from 60 ° C to 400 ° C for industrial applications. In the electrical area, we develop self-consumption photovoltaic projects with powers up to 300kW, PMGDs (Small Distributed Generation Means) projects for powers from 3MW to 9MW and other large-scale projects with powers up to 100MW.

Our service as a developer of photovoltaic projects is regulated in accordance with the Chilean legal framework and the client's requirements. This includes: 1-connection procedures with electricity distribution companies or with CEN depending on the type of Project. 2-electrical connection studies. 3-search for suitable land for the Project. 4-negotiation with owners. 5-promises and lease agreements. 6-mining concessions. 7-favorable construction report SAG and MINVU. 8-environmental permits. 9-topographic, hydrological and geotechnical studies. Consequently, Cool Power SpA is responsible for the complete development of the photovoltaic project up to the Ready To Build (RTB) phase.

#### **COMPANY PROFILE:**

De Nora works closely in partnership with end users, contracting and engineering firms to provide solutions for some of the most pressing and complex water treatment applications using its proprietary disinfection, filtration and electrochemical solutions. Leveraging almost a century of experience, the expertise of 1600 dedicated employees and access to 3,000 patents across 350 families, we make water treatment easy for you through:

- Best available technology with the integration of ISIA SpA into De Nora
- Ease of operation
- Low cost of ownership thanks to low power consumption and process yield
- Performance you can trust to keep your water supplies safe in the face of regulated and upcoming contaminants of concern

For generations, the Capital Controls name has been synonymous with water treatment. We have sold

more than 10,000 installations globally across a range of applications over a 60-year period - this includes more than 1,000 chlorine dioxide generator installations in the field. Now with the acquisition of ISIA SpA, De Nora customers can be assured of receiving the best available technology for their specific water treatment applications.

#### **COMPANY PROFILE:**

Diamondlease was established in the year 1996 with the sole objective of offering automotive rental and leasing to all its valued customers, as an alternative to owning and maintaining vehicles.

Building on the well established reputation of the Al Habtoor Group, DIAMONDLEASE today has grown to be one of the largest and well reputed car rental and leasing companies in the UAE.

DIAMONDLEASE is an ISO 9001:2015 certified company with a fleet of over 12000 dealer maintained vehicles ranging from saloon cars, SUV'S, pick up trucks and buses.

DIAMONDLEASE is backed by the infrastructure and expertise of Al Habtoor Motors who are the ex-

clusive dealers for automotive brands such as Mitsubishi, Bentley, and Aston Martin & Bugatti in the UAE.

At Diamondlease, customers have the option of availing Daily, Weekly and Monthly car hire as well as long term Lease at very competitive rates. Diamond lease also offers Limousine Service through an exclusive fleet of cars like Bentley, BMW, Lexus, Mercedes and Bus Transportation to hotels, offices and tour operators.

DIAMONDLEASE was the first car rental company to be nominated as a member of the Dubai Service Excellence Scheme (DSES) in 2003, and continues to be a member till date.

DIAMONDLEASE has consistently bagged the MENA (Middle East & North Africa) travel awards in acknowledgement of its outstanding achievement as "Best Car Rental Company- Local Brand for five consecutive years from 2004 to 2008.

DIAMONDLEASE has an extensive network of branches covering

1. Dubai Investment Park (Head Office)
2. Al Quoz
3. Habtoor Grand Resort & Spa
4. Sharjah
5. Musaffah, Abu Dhabi
6. Fujairah
7. Ras Al Khaimah
8. Aweer Used Car Showroom
9. Sharjah Used Car Showroom
10. Silicon Oasis
11. Hilton Hotel

Diamondlease provides 24x7 emergency road-side assistance to all its customers.

DIAMONDLEASE team is trained to conduct business in an efficient, courteous and caring manner, aiming to provide maximum customer satisfaction.

Built over an area of nearly 310,000 sq ft, the Diamondlease operation center contains facilities for lube service, brake and A/C repairs, tyre, & battery shop, vehicle wash /vacuuming, in-house fuelling station and a stock yard to accommodate 500 vehicles.

The centralized administrative functions of Operations, IT and HR/Admin are housed within the DIP facility.

## COMPANY PROFILE:

Dubai Supreme Council of Energy (DSCE) was formed as an independent legal entity in August 2009 under Law 19 of 2009, issued by His Highness Sheikh Mohammed bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE, and Ruler of Dubai. DSCE is the governing body tasked with policy development, planning and coordination with concerned authorities & energy bodies to deliver new energy sources while employing a balanced approach to protecting the environment. The DSCE seeks to ensure that the Emirate's growing economy will have all the power it needs for the future through providing energy at a reasonable cost while preserving the environment. The Council develops strategies to help deploy new energy sources for the emirate as it becomes less dependent on fossil fuels. Under the visionary guidance of His Highness Sheikh Mohammed bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE, and Ruler of Dubai, DSCE developed the Dubai Integrated Energy Strategy 2030 (DIES) in 2010 and deployed in 2011 to set the strategic direction of Dubai towards securing sustainable supply of energy and enhancing demand efficiency (water, power & transportation fuel).

## COMPANY PROFILE:

EDF About EDF

As a major player in energy transition, the EDF Group is an integrated energy company active in all businesses: generation, transmission, distribution, energy trading, energy sales and energy services. EDF group is a world leader in low-carbon energy, having developed a diverse production mix based mainly on nuclear and renewable energy (including hydropower). It is also investing in new technologies to support energy transition. EDF's raison d'être is to build a net zero energy future with electricity and innovative solutions and services, to help save the planet and drive well-being and economic development. The Group is involved in supplying energy and services to approximately 37.9 million customers (1), of whom 28.7 million in France (2). It generated consolidated sales of €69.0 billion in 2020. EDF is listed on the Paris Stock Exchange.

## PRODUCTS:

PV plants on the ground and on the roof, wind farms, biomass plants and WTE

## COMPANY PROFILE:

Eemaxx Engineering srl, a member of Eemaxx Group and our development company, is a turnkey project developer and as ESCO is present in the Renewable Energy and Energy Efficiency Program in several countries in Europe, MENA, WEST AFRICA, SOUTH AFRICA and ASEAN. Our business model is BOT (Build Operate and Transfer) and IPP, providing EPC services. As the general contractor, we deliver all the services towards the completion of turn-key PV plants on the ground and on the roof, wind farms, biomass plants and WTE, including procurement or production of all necessary equipment and parts, as well as the installation. Moreover, we developed a new approach to PV by offering distributed energy and market parity services including dispatching energy on and off grid if needed: SOLAR POWER PLANTS on the roofs of factories, hotels, shopping mall, waste water treatment plant, water treatment plant and supply systems with installation of storage batteries and small off-grid systems.

### United States

Telephone: 13056552755

Email: dbled@electrolytictech.com

Website: www.electrolytictech.com

Contact Person: Ms. Jade Lubie

### PRODUCTS:

Electrolytic Technologies Systems (ETS) specializes in the manufacturing of on-site chlorine gas and 12.5% sodium hypochlorite generators. These fully engineered, factory-tested, and ready-for-installation plants utilize unique technology and are commissioned under the trade name KlorigenTM. Operating since 2001, ETS' global commercial customer base, including chemical and bleach producers, produces in excess of 200,000kg of chlorine daily. Electrolytic Technologies Systems (ETS) principal technology, KlorigenTM, produces non-pressurized chlorine gas, membrane-grade sodium

hydroxide, and high strength sodium hypochlorite at point-of-use, using only salt, water, and electricity. This point-of-use generation significantly reduces the costs and eliminates the risks associated with the transportation of these products in traditional chlorine and sodium hypochlorite applications. Klorigen™ generated chemicals meet NSF/ANSI Standard 60 requirements and the process has been labeled by the U.S. Department of Homeland Security as a “Qualified Anti-Terrorism Technology”. Intuitive operating software, coupled with robust mechanical design, facilitates the efficient and economical operation of the Klorigen™ plants. The efficient operating economics of Klorigen™ is further compounded by its inherent independence from third party chemical procurement. The Klorigen™ technology is typically used in water and wastewater treatment, pulp and paper manufacturing, mining, and power generation. Additional commercial and industrial applications include chemical supply companies, detergent industries, and mineral refining.

### COMPANY PROFILE:

Electrolytic Technologies Systems (ETS) specializes in the manufacturing of on-site chlorine gas and 12.5% sodium hypochlorite generators. These fully engineered, factory-tested, and ready-for-installation plants utilize unique technology and are commissioned under the trade name Klorigen (TM). Operating since 2001, ETS’ global commercial customer base, including chemical and bleach producers, produces in excess of 200,000kg of chlorine daily.

**PRODUCTS:**

The company has consolidated experience in the construction, carpentry and machining sectors for the supply of complete plant machinery in the following sectors: steel, energy, chemical, petrochemical, nuclear. In addition, the company is also involved in: the construction of spare parts in general, the construction and overhaul of electric motors and electrical and electronic equipment, mechanical and electrical maintenance, the design and construction of precision components, mechanical machining and medium-heavy mechanical carpentry for industry.

**COMPANY PROFILE:**

Elettromeccanica Viotto S.r.l. was founded in 1958, and is still family-run. It continuously expands its activity at the disposal of its customers both in Italy and abroad, constantly improving quality and professionalism, strictly adhering to delivery times and creating tailor-made solutions for each customer.

The company has consolidated experience in the construction, carpentry and machining sectors for the supply of complete plant machinery in the following sectors: steel, energy, chemical, petrochemical, nuclear.

The plant in San Donà di Piave, in the province of Venice, operates on a covered area of 15,000 square metres, where over ninety experts in the electrical and mechanical sectors work. The expansion and size of the new machinery meant that a second plant had to be opened about 800 metres from the main office.

Viotto also offers the market not only innovative and highly reliable products, but also an adequate after-sales service structured to guarantee the protection and functionality of its products.

Solenoid-driven, motor-driven and stepper motor dosing pumps, advanced chlorine dioxide disinfection systems, control systems, pulse emitting water meters, probes and accessories.

**COMPANY PROFILE:**

EMEC has been part of Italian and global technological innovation for more than 35 years. We design, program and manufacture high quality systems for water treatment and chemical dosing, including a wide range of solenoid-driven, motor-driven and stepper motor dosing pumps, advanced chlorine dioxide disinfection systems, control systems, pulse emitting water meters, probes and accessories. Our most advanced dosing pumps are equipped with display and electronic multifunction control and can be remotely controlled with ERMES, our exclusive online platform. Thanks to our production sites with vertical manufacturing system, we stand out for delivering reliable products with the highest price-quality standards.

EMEC also assembles special all-in-one solutions for any specific application, like in swimming pools and for cooling towers. We can customize all our products and also offer customized and complete all-in-one solutions to meet any customer's need: our customers are central, we focus on their needs and we offer them the best solution to ensure a solid and profitable relationship. On top of that, our customers can rely on our constant support leading up to and after product purchase. Pre- and post-sales services address all of our customers' requirements and potential customization needs.

By offering reliable systems constantly up to date, our production meets a wide range of needs and several application fields, like swimming pools, Legionella prevention, food and beverage industry, animal farming, aquariums, hotels, spas, oil and chemical industry, industrial water treatment, potable water treatment, hospitals, cooling towers, fertigation and car wash.

### PRODUCTS:

we are an agency organizing the booth for companies.

### COMPANY PROFILE:

The Flanders Investment & Trade agency promotes sustainable international business, in the interest of both Flanders-based companies and overseas enterprises. Whatever sector you are involved in, Flanders Investment & Trade will help you establish contact with the Flemish companies you are looking for. This includes not only products or services you may be sourcing, but also various types of business relationships, from joint ventures to technology transfers. At another level Flanders Investment & Trade enhances Flanders' position as the gateway to Europe for inward investors. The agency identifies, informs, advises and supports overseas enterprises by establishing production and research facilities, contact centers, headquarters, logistics operations and the like in Flanders, the northern region of Belgium. This broad focus on international entrepreneurship, involving outward trade as well as inward investments, requires not only a thorough knowledge of Flemish economy, but also an extensive network outside of Flanders. We have just that for you. Do visit our website and discover our worldwide network. With over 100 offices we are bound to be conveniently located near you, wherever you are.

Contact Person: Ms. Melania Bellettini

### PRODUCTS:

ARCOSTOP is an arc fault detection system for photovoltaic systems and direct current systems. When there is an arc fault, the ARCOSTOP system detects an abnormal frequency and removes the breakdown very quickly before fire starts. The ARCOSTOP system is composed of as many toroidal sensors as the strings of the PV system, and each one is connected to an electronic board, which is inside an electronic panel. ARCOSTOP provides to open the protection DC side and to report the event, both visually through a lighting red led and by sending a voice message via GSM or through other means of communication. The ARCOSTOP detector must be calibrated, since it detects all the frequencies, and it is necessary to set the arc fault frequency for its recognition.

### COMPANY PROFILE:

Flash Innovations is an innovative start-up created in November 2020 for building and marketing the patented ARCOSTOP arc fault detection system for photovoltaic systems. Other patents for seismic safety and agricultural works are under development. ARCOSTOP detects and removes series arc faults, avoiding fires and saving goods and people. This device is exceptionally reliable since it does not give false alarms. It is in line with UL1699B American standards. It is very appreciated by firemen, insurances and experts.

ARCOSTOP is the sole reliable device. The installation of such a device is mandatory in several insurances and national standards, as the above-mentioned UL1699B American standards.

### PRODUCTS:

Products: FLUXUS flow meter and PIOX process analyzer. The clamp-on ultrasonic measurement systems FLUXUS measure virtually anything that flows, liquids as well as gases including steam. As the transducers are clamped on to the outside of the pipe, the measurement system is not exposed to any wear, tear or abrasion from the medium flowing inside the pipe. Further, all transducers and transmitters are available in various hazardous area certified transmitters and transducers for ATEX, IECEx Zone 1 and 2 as well as FM Class I, Div. 1 / 2 are available. For non-invasive concentration, density and mass flow measurement FLEXIM engineered the PIOX product range. PIOX S is primarily used for the non-invasive online concentration, density and mass flow measurement of chemically aggressive, corrosive, abrasive or ultra-pure media. The inline Process Refractometer PIOX R measures a liquids concentration by the measurement of light refraction and is also a well-established method of choice for determining the concentration, density and purity of many liquids within the Chemical Industry.

### COMPANY PROFILE:

FLEXIM manufactures and supplies highly innovative flow metering solutions for liquids and gases, as well as process analytics for liquids.

## COMPANY PROFILE:

Gielle offers the services of recovery, regeneration and disposal of exhausted products in according with rules and regulation.

Infact, holder of a Program Agreement with the Ministry of the Environment, Gielle collects exhausted refrigerant and extinguishing gases throughout the country and then proceeds with recycling and regeneration.

Our team of experts is able to ensure to you not only the supply of gases, but also the management of any problems you could have.

Gielle offers a complete range of refrigerant fluids and gases for each need and for all purpose, becoming a role model for many of the operators in the refrigeration and air conditioning sector. In these fields Gielle provides: R134a, R404a, R407a, R407c, R410a, R417a, R417b, R507, R508a, R32, R125. From the consolidated R134a or R404a, with high impact in terms of GWP, to the latest products with lower GWP such as R1234y or R1234ze.

Gielle, which has always been committed to protecting the environment, offers more sustainable solutions in addition to traditional hydrofluorocarbons (HFCs): new low gwp blends, based on hydro-fluor olefins (HFO), and natural refrigerants.

The supply is available in the widest variety of packaging: for example in bulk isotank and in cylinders.

**PRODUCTS:**

Wastewater Recycling and Grease Shield FOGs Recycling

**COMPANY PROFILE:**

Green Sands is a professional business-to-business service and supplies company serving the Middle East and North Africa from its base in Abu Dhabi. In partnership with world-class technology companies, our experts provide secure and sustainable solutions that meet the operational and budgetary requirements of our customers.

We work in close cooperation with our clients who seek to reduce their impact upon the environment whilst also reducing operational costs. Initial meetings focus on the clients' current situation and objectives whilst site surveys and technical follow up meetings identify specific opportunities and potential solutions. Having representation, reseller and distribution agreements in place with leading

international technology suppliers, Green Sands engages with subject matter experts in those organisations and offers best in class solutions to clients in the region.

Particular areas of expertise and solutions provided include:

- Wastewater Recycling
- Grease Traps – Fats Oils and Grease (FOGs) Recycling
- Food Waste Digesters
- Waste Plastic to Oil Conversion
- Biodiesel Production

Sustainable Packaging, Composting Machines

## COMPANY PROFILE:

GreenGood Eco-tech FZCO

GreenGood in the Middle East started 10 years ago with a vision to provide environment friendly disposable products and food waste composting solutions.

We are leading suppliers of Customized paper products to all leading Fast-food restaurants, coffee concepts, Hotels and theme parks. We supply paper cups, take away boxes, pouches, bags, wraps and bagasse products from China, unique café & catering solutions from UK, USA, Europe and South East Asia. We offer specialty packaging which is environmentally friendly, Sustainable packaging for fast growing take away industry. Our team of people have over 20 years' experience of selling disposable paper and plastic products in the Middle East market.

We have partnered with Oklin International Ltd – Headquartered in Hong Kong and manufacture composting machines in China and distribute worldwide a complete line of composting machines to help solve the problems of food waste disposal. It works with assisted living communities, catering companies, schools and other public institutions to establish a “closed loop” program of minimizing carbon footprints. Oklin machines are marketed worldwide under the GreenGood, Closed Loop Organics and other brand names. Over 18 years of selling machines in Korea and Japan, our machines are currently operational in Australia, Canada, USA, Hong Kong, China, India and Europe.

GRP INDUSTRIES

#### PRODUCTS:

Single Door Enclosure, Double Door Enclosure, Metering Enclosure, Water Meter Enclosure, Integrated Canopy Enclosure, Instrument Enclosure, Fire Cabinet, Safety Cabinet, Junction Box and Prototype Kiosk.

#### COMPANY PROFILE:

We are a manufacturer of industrial composite products with a focus on designing, manufacturing and delivering a customized range of weatherproof enclosures that cater specifically to the industries we operate in and we have been doing it for over 30 years. Our headquarters are based in the developed nation of United Arab Emirates, but our supply stretches globally from the Americas to the Far East. We are the trusted partner for utility authorities across the Gulf Cooperation Council (GCC)

Countries along with global contractors across several industries. Our name GRP is synonymous with Glass Reinforced Polyester materials and is our preferred composite material of manufacturing for its design flexibility, steel matching strength and insulating properties with anti-corrosion features. With grp materials, our products are custom designed as per your requirement to deliver our highest priority promise: Protection. Critical design elements such as the sealing, locking mechanism and resistance to fire are considered; without neglecting functionality, aesthetics and long-term reliability of our products. These efforts are capped off by our Quality Department rigorously inspecting all these components and certifying them by independent labs to international protection standards in the US, UK, and Europe.

Therefore, as a key initiative of the National Transformation Program, Invest Saudi was created by the General Investment Authority (SAGIA) to be the national investment promotion brand of the Kingdom.

Invest Saudi is a communication platform that serves all government entities with regards to promoting the Kingdom as a future-ready investment destination. Invest Saudi is tasked with diversifying the economy through attracting high-value investments beyond the oil industry.

The Kingdom is living in an era where the economy is thriving and the nation is reviving. There is an ocean of untapped potential that needs to be explored by local and foreign investors. After launching Vision 2030, the growth of the Saudi market is continuing, which is opening up doors to innovative investments in a sustainable business environment. The Saudi economic market has gone through dramatic, positive changes. Therefore, Saudi Arabia is becoming an attractive investment destination that provides rich opportunities in various sectors, exceptional resources and market conditions, and simplified investment restrictions and regulations.

Invest Saudi is aiming to create a positive impact for investors throughout their journey in Saudi Arabia. Therefore, we are committed to partner with them to achieve high-value results.

## PRODUCTS:

The JL Series Integrated STP is a major innovation in the application of high-concentration activated sludge processes to sewage treatment. The JL-Z Treatment system utilizes SPRAS Technology (Sludge Production Activated Sludge Process), the hydraulic retention time (HRT) and the sludge age (SRT) are completely separated, and the biochemical effect is improved while the operation control of the

system is maintained to obtain highest possible output for stable and high-quality effluent water quality is obtained. The system consisted of 4 parts: bio-selection tank, Anoxic tank, Aerobic tank and final sedimentation tank.

### COMPANY PROFILE:

JINLUO Water Company, founded in 1995 in P.R. China, is a large international water company equipped with proprietary intellectual property rights and ample financial resources. Our extensive expertise lies in provision of efficient, effective and reliable water solutions including engineering & design, manufacturing, construction, testing & commissioning, operation and maintenance of water and wastewater networks infrastructures.

JINLUO Water is the patented manufacturer, supplier and operator of the JW STP's, Innovative compacted Sewage Treatment Plants with capacities varying form 0.25 m3 to 20,000 m3 per day, JINLUO water line of STP's adopts a cutting edge "Patented" technologies to treat waste water with ultimate efficiency throughout reduced footprint, reduced power consumption and high rates of sludge reduction using the patented technologies obtained by JINLUO's R&D Teams after years of successful trials.

## PRODUCTS:

KLUDI RAK will display its premium range of bathroom mixers along with highly water-efficient water-conserving aerators - that can save up to 90% of water usage!

## COMPANY PROFILE:

KLUDI RAK -an ISO 9001:2015 certified company- is a joint venture between world's largest ceramics' brand "RAK Ceramics" and Germany-based bathroom and kitchen fittings specialist KLUDI. KLUDI RAK manufactures high quality German bathroom and kitchen fittings and accessories at their state-of-the-art plant of approximately 12,000 square meters of area at Ras Al Khaimah, UAE.

KLUDI RAK uses brass and copper alloy of the finest quality conforming to European standards EN 50930-6 and EN 817. KLUDI RAK products are in accordance with the European Drinking Water Standards. All KLUDI RAK faucets are fitted with ceramic cartridge having ceramic disks to ensure a long trouble-free life. These special ceramic cartridges have an effortless movement that fulfils the endurance test under EN817 with 210,000 cycles without damage.

KLUDI RAK's impressive product range -which is made with high-quality raw materials and components exclusively imported from Europe- comprises of precision-perfect fittings that are designed using the latest in European technology.

KLUDI RAK enjoys a total production capacity of one million products per year, and is the sole company in the GCC region that manufactures a range of faucets and mixers entirely within its production facility.

KLUDI RAK's products meet the stringent European norms and have been certified by the world's most prestigious certification bodies such as DVGW Certifications of Germany; WRAS of UK; SASO Quality Mark of Saudi Arabia; Abu Dhabi Quality and Conformity Council (ADQCC), Emirates Green Building of UAE; and SONCAP of Nigeria - amongst many others. KLUDI RAK's products have been issued the Water Efficiency Label from Emirates Authority for Standardization and Metrology (ESMA) of the UAE. KLUDI RAK is amongst the first companies to have 5-star ratings from ESMA for its products. KLUDI RAK has been accorded with the Abu Dhabi Trust Mark Trophy by Abu Dhabi Quality and Conformity Council for its commitment towards meeting safety and quality standards.

KLUDI RAK is a proud supply partner of the region's remarkable landmarks such as Sheikh Mohammed Bin Zayed City, Dubai Frame, Mecca Tower and 7,000 houses for Thakher City in Saudi Arabia, alongside many five-star hotels and residential complexes.

KLUDI RAK's products are exported to all GCC countries, Indian sub-continent, Africa and the rest of the world.

KLUDI RAK follows strict quality standards and offers 10-year warranty to its portfolio of mixers — a feat that stands unrivalled by any competitor in the market.

M+ Solar by PETRONAS is a solar PV project developer, thus, have no products on display at the event.

### COMPANY PROFILE:

M+ Solar is a member of Petronas Group Malaysia (Fortune 500 Company) & a leader in providing distributed solar and energy solutions to industrial and commercial customers across Asia. M+ Solar owns and manages a portfolio of operational and under-construction plants of approx. 850 MWp, serving more than 150 customers at over 275 locations under its brand 'M+ Solar'.

Today M+ Solar has emerged as one of the leaders in the distributed energy sector through its unique advantage of understanding this space as compared to other leading players. The company specializes in rooftop solar power plants over building rooftops, car parks, and open spaces within the premises on Build Own Operate Transfer (BOOT) basis and is an end-to-end solution provider – including Design, Engineering, Procurement, Construction, Monitoring and Maintenance.

The USP of the company is its business model (BOOT/Opex model) - delivering immediate, risk-free savings with no investment from the customer or any hassle of operations or maintenance, combined with full attention to their needs. With its Customer First motto, M+ Solar aims at alleviating the concerns of customers associated with high capital expenditure upfront. The company strives to create value for its customers through efficiencies in development, financing, construction, and operation of distributed solar energy projects across the country.

M+ Solar has a diverse portfolio of clients including manufacturing organizations across Aerospace & Defence, Automotive, FMCG, Consumer Durables, Pharma, Food processing, etc. as well as commercial establishments like Retail chains, Educational Institutes, Hospitals & Healthcare, Office buildings, Malls etc. As of now, M+ Solar's client base includes renowned multinational firms viz. Yamaha, Whirlpool, Walmart, ABB, TVS, Amazon, Amway, Halliburton, GE, Honda, Mahindra, among others.

**PRODUCTS:**

SOLAR.

**COMPANY PROFILE:**

MAETEL is a multinational company belonging to the industrial division ACS Group, which operates in over than 15 countries in Europe, America and Asia With 20 years of experience, MAETEL has become a reference in several Industrial Sectors (paper, steel, cement, mining, automotive...), Substations and Power Lines and in the Energy Sector (solar, photovoltaic, thermosolar, wind, biomass), building turn-key EPC projects and performing their Operation and Maintenance.

Aware of the environment and sustainable development, we contribute to the generation of clean energy and the reduction of CO2 emissions into the atmosphere in order to build a more sustainable world.

MAETEL was founded in 2000. With headquarters in Zaragoza (Spain) , it is a company dedicated to the development of projects and the operation of Industrial Plants, Renewable Energies (solar, wind, biomass...), Substations, Power Lines, Automation and Instrumentation and Control. Based on the people that make up MAETEL, we have approached sustainable growth without abandoning our fundamental values: customer orientation, flexibility, perseverance, humility, proactivity, promotion of talent, efficiency, technical rigor and vocation for service.

MAETEL have the capability and experience to undertake Turnkey Renewable energy power plant projects with its strengths in EPC(Engineering, Procurement, Construction),Commissioning ,remote monitoring solutions and O&M.

The ACS Group is a worldwide reference in the construction industry and in the development of both civil and industrial infrastructures. A group which participates in the development of key sectors for the economy such as infrastructures and energy. A company committed to the economic, social and environmental progress of the countries in which it is present.

Since 2013, the ACS Group has led the ENR ranking of International Contractors.

MAETEL has the public recognition of the initiatives and good practices in Social Responsibility and Sustainability, having been awarded the Seals of Social Responsibility of aragon in 2017, 2018, 2019 and 2020.

In 2019, MAETEL receives the Social Responsibility Seal of Aragon 2020, which seeks to encourage organisations that hold this Seal to deepen in key aspects of Corporate Social Responsibility. Thus,

MAETEL fulfills one of the main objectives set in the 2017 report.

AETEL's policy is demanding and proactive in relation to the preservation of the environment. The company is committed to a responsible industrial development that makes a rational use of resources.

Contact Person: Mr. Massimiliano Masi

### PRODUCTS:

MGTES is a long life and innovative Thermal Energy Storage (TES) solution developed and consolidated by Magaldi in recent years, capable of playing a fundamental role in the global decarbonization and energy optimization of industrial process. MGTES is an high temperature TES featured by fluidized sand bed, internally insulated and refractory lined, capable of receiving electrical and thermal energy trough immersed elements, accumulating it in the storage media, which allow to reach temperature up to 1000 °C, and releasing it in the moment of greatest need. The possibility to choose the quantity of mass of solid particles contained in the single module, makes MGTES technology a modular system, able to size the energy capacity according to the needs. In order to obtain flexible storage capacities and discharge times, several modules can be coupled together. In particular, the MGTES technology is able to cover a wide operating range in terms discharge duration, pass through 4 hours standard sizing up to exceeding 10 hours representing a Long Thermal Storage solution. STEM (Solar Thermal Energy Magaldi) is a patented CSP (Concentrated Solar Power) technology with TES (Thermal Energy Storage), which collects and converts solar energy into thermal energy to be used immediately or stored and dispatched on-demand. The stored thermal energy can be provided as steam or hot air for industrial processes in the CST (Concentrated Solar Thermal) configuration or for electricity generation. The key element is a fluidized sand bed which allows to reach high temperatures with consequent high capacity in thermal energy storage.

### COMPANY PROFILE:

Incorporated in 1929, Magaldi is a leader in customized solutions to convey materials at very high temperatures and in severe process conditions, guaranteeing the highest dependability and environmental protection.

The Company has been able to secure more than 55 patents for proprietary technologies (of which 10 patents on STEM technology).

In the last decade, Magaldi has been developing innovative technologies in the renewable energy generation and storage sector: founded in 2021, Magaldi Green Energy is the start up branch company focused on research, development, production and marketing of innovative technologies in the renewable energy generation and storage sector: STEM (Solar Thermal Energy Magaldi) and MGTES

(Magaldi Green Thermal Energy Storage).

In cooperation with valuable Research Institutes and Universities, Magaldi Green Energy team is pursuing an ambitious project aimed at constantly improving STEM® technology which presents the right credentials to revolutionize the renewable energy sector.

## PRODUCTS:

UPVC, HDPE, DWC PIPES & FITTINGS

## COMPANY PROFILE:

Muna Noor was set up 46 years ago as a plastic pipe manufacturer and one of Oman's first companies. As part of the brand's progressive character, capacities and product ranges are continuously expanded. Product innovation and development within plastic pipework has remained at the core of our operation and committed to providing excellent customer service, and experienced team of Technical Support staff are on hand to offer technical assistance on any given project and are capable of advising on product suitability for when the process of conveyance of chemicals is required within a pipework system.

To date, Muna Noor's divisions deliver large-scale and bespoke HDPE, uPVC, DWC, and Multi-layer HDPE pipes, fittings, plastic fabrication, lining for steel pipe, traditional electrofusion welding solutions, complete irrigation systems, SCADA control systems, and a multiplicity of valves and controls

for water. The company develops state-of-the-art product solutions to exceed client expectations and collaborate on new and exciting projects.

Muna Noor can offer unique pipe solutions for modern, unconventional, and economic pipe-laying applications in dredging, desalination, water, and sewage, irrigation, oil and gas, telecoms, industrial, mining, construction, and infrastructure sectors.

The Muna Noor brand is synonymous with superior pipe manufacturing, and their products are being installed throughout the Middle East and internationally for many different applications. As an ISO 9001:2015 certified company, our primary commitment is to deliver quality products and services to clients. Financial industry leaders have also recognized Muna Noor's quality and success.

Atex electric submersible pumps suitable for potentially explosive atmospheres for the pumping of

leachate, contaminated water, hydrocarbons, combined with accessories already wired and ready to use ( All In One solutions)

### COMPANY PROFILE:

Officine di Trevi is specialized in the production of electric submersible pumps with OFT trademark since 1968. Nowadays OFT brand includes a wide choice of electric submersible pumps ranging from 3", 4" and 6" pumps, also with hydraulic parts in stainless steel, to monobloc pumps and last generation pressure plants. In recent years the company became European leader in the manufacture of submersible and external ATEX certified electric pumps, suitable for use in potentially explosive places, right for pumping contaminated liquids, landfill leachate and hydrocarbons. The electric pumps are always customized according to the liquid to be pumped and the conditions of the installation site. They are produced on request directly with the meters of electrical cable necessary avoiding joints and suitable for the use that the customer must make of them. Some electric pump models can be used in hot liquids up to 80 ° C. In the case of pumping charged liquids such as landfill leachate, we recommend pumps equipped with floating impellers able to resist even the presence of solid particles suspended inside the liquid. The Maxifilter, an accessory that prevents clogging of electric pumps, is also available with slope riser (trolley and wheels) for installation in oblique wells. We have ready-to-use All in One solutions, consisting of electric pump, electrical control panel and accessories for liquid level control (transmitters or regulators), atex or non-atex.

## PRODUCTS:

Patents, eco-sustainable solutions, services for business investments

## COMPANY PROFILE:

Apulia is a dynamic region in the southeast of Italy, steeped in history but as innovative as the Silicon Valley, where the endless beauty of the sea and rural landscapes have turned it into a top tourist destination and where the high quality of life represents an asset for local businesses. Boasting a strategic geographical position, a supportive business environment and a modern and efficient infrastructure network, the region offers numerous advantages to potential investors and represents the ideal location for smart companies looking to strengthen their presence in Europe, at the heart of the Mediterranean. Recognised as one of the most industrious regions in the south of Italy, with over 327,133 active businesses registered in 2020 and an ever-increasing international standing, the region's attractiveness as a business location has become more and more tangible over recent years, boosted by regional incentives for business investment projects. The Apulia regional government stands out for its commitment to investment in research and innovation, focusing mainly on smart technologies and providing a significant boost both to hi-tech and traditional sectors.

Regional incentives and investments have fostered the creation of a world class innovation eco-system, based on an integrated network of private and public research entities, including universities, business and technological clusters, in addition to over 500 innovative start-ups and spinoffs.

The regional government also actively supports international business development and promotes the regional green economy sector on major international markets.

## PRODUCTS:

Initiatives for business investments in Apulia and support to start-ups and investors.

## COMPANY PROFILE:

PUGLIA SVILUPPO S.P.A. is the regional development agency that manages initiatives for business investments in Apulia and provides support to start-ups and investors, guiding them step-by-step through the investment process.

The regional government has devised a wide range of incentive initiatives and packages, tailored to meet the needs of business startups, S.M.E.'s as well as large multinational enterprises, which, based on the type and size of proposed investments, typically offer a combination of financial aid and reduced interest rate loans, helping to ease the cost of new business investments.

In addition to regional grants companies setting up in Apulia can also benefit from a series of tax incentives made available by the Italian government, including tax credits on R&D investments, tax relief on social security contributions and employment bonuses which help reduce labour costs. Puglia Sviluppo S.p.A., member of the European EBN Innovation Network, also makes available working spaces and services to start-ups and innovative new businesses, through three business incubators, located near Bari, Taranto and Lecce, offering competitive costs and 100Mbps ultrafast broadband.

Environmental Services - Industrial Services - Port Services - Decommissioning - Freight and Waste Transportation - Waste Management Systems

**COMPANY PROFILE:**

SIR provides services to large public and private companies in the energy, steel, oil, pharmaceutical and food sectors, throughout Italy and abroad.

We deal with industrial and environmental services, freight and waste transportation, reclamation, waste treatment and port services. With forty years of experience in the sector, SIR possesses the skills

and the technical and organisational expertise which enable us to offer an integrated and professional service to our public and private customers.

#### **PRODUCTS:**

Pipes , Grp Manhole Cover , Grp Chamber , Insulation Form , Smart Manhole Covers.

#### **COMPANY PROFILE:**

Smithline Reinforced Composites is an established venture (ISO 9001, 14001, 45001 certified and WRAS UK Certified) in the field of reinforced composite materials in the Middle East Region. The company's founders believe in the policy of using advanced technical expertise and high-quality raw materials to provide our customers with superior quality pipes and other GRP/GRV/GRE products. With the use of advanced machinery in our growing production facility along with a trained workforce, we seek to satisfy the growing demand for GRP products in the region.

Pipe systems serve a similar function as the veins in the human body. Pipes are utilized in various fields for distribution, transmission or as an industry's engineering component. Our products like GRP/GRV/GRE Pipes and fittings will cater to various streams of infrastructure – construction, petrochemical plants, sewerage lines, drainage lines, desalination plants, potable water supply, cooling water lines, district cooling systems and many more.

Smithline GRP covers & frames are Eco friendly; carbon footprint is 50% less than ductile iron covers and 25% lighter than steel covers. Since these covers are locally made, it meets Estidama requirements and it is sustainable & environmentally green product.

Smithline designed & developed and manufacturing GRP manhole covers & frames, GRP manholes from 2013. Smithline is the first company to manufacture GRP manholes covers in United Arab Emirates. Our GRP covers & frames are approved by DEWA, Etisalat, SEWA, ADM, RAKWA, and also approved in QATAR & Oman. More than 50,000 covers are installed all over UAE, QATAR, OMAN.

Smithline GRP Covers & frames are manufactured to BS EN124 and load tested according to load class. We produce D400, C250 and B125 class covers & frames.

SolarCleanso

developed by cleaners

**PRODUCTS:**

SolarCleanso F1 is a solar panel cleaning robot with the highest cleaning capacity on the market. One robot = up to 10,000 m<sup>2</sup> = 1 day. The robot is suitable for all solar installations and is used more and more for window cleaning. Its 1.2m or 2.2m brushes enable precise cleaning of solar panels and frames. Brushes have been fitted with two different fibre types in helicoidal pattern, boosting cleaning efficiency without leaving any trace. The SolarCleanso F1 is fully modular. It can be dismantled into 4 parts and can be easily carried by one person. The assembly and disassembly of robot can be completed within a few minutes. The robot is battery-powered and controlled from ground level with a remote control. As an option, a wireless camera and LED system can be installed for even easier navigation at night. With the SolarCleanso F1 at work, solar panels will regain their fullest energy output while saving additional maintenance costs. For more information, please visit: [www.solarcleano.com](http://www.solarcleano.com)

**COMPANY PROFILE:**

SolarCleanso is a Luxembourg-based robotics company focusing on the design and distribution of solar panel cleaning robots.

Our robots are suitable for wet and dry cleaning, and can work on all types of solar installations at 25-degree angle or more.

In less than 4 years, SolarCleanso robots are already actively working in 45 countries on 5 continents. In 2020, our robots cleaned 13 GW solar installations globally.

## SOWA – SAVING OF WATER AS PRODUKT

Zajezierze 5c, 88-140 Zajezierze, Poland

### Poland

Telephone: +48690 009 235

Email: kontakt@sowa.expert

Website: www.sowa.expert

Contact Person: Mr. Elkhedr Ibrahim

## PRODUCTS:

The SOWA system and technology are aimed at owners of private and public swimming pools (hotels, aquaparks, sanatoriums, spas, holiday centers) who have a high ecological and economic awareness of the need to save water. For the owner of a public swimming pool, the costs of heat and water are one of the largest costs of maintaining a facility. Similar problems concern the owners of private swimming pools, who, due to infrastructural and environmental reasons, had a limited possibility of building a swimming pool (e.g. due to the lack of access to a sufficient amount of water and the inability to discharge technological sewage).

## COMPANY PROFILE:

SOWA – SAVING OF WATER AS PRODUKT - Water Recovery System concerns the rinse water purification technology, which was created as part of the activity of the AS PRODUCT Research and Development Center in Zajezierze for the needs of the market. In the times of the global crisis related to the access to drinking water, solutions are being sought that allow for a significant reduction in its consumption. The SOWA technology enables the reuse of washings from swimming pool filters up to 96%, which significantly reduces the demand for tap water, reduces the costs associated with

its heating and waste disposal. The SOWA system uses a filtration system consisting of nano-spectrum and ultrafiltration filters, replacing the filtration membranes used so far. The system consists of a number of elements in the form of a rinse water tank in which the flocculation process takes place, a pre-filter in which the process of preliminary water filtration takes place, and a nanoultrafiltration unit in which absolute filtration takes place. The nanoultrafiltration unit consists of hemodialysis medical filters that have been recycled through cleaning and then sterilization. All components of the filtered water with particles larger than 0.03  $\mu\text{m}$  are retained on the filter fiber. The medical-grade filters used in the system, thanks to the smooth surface of the fibers, do not require an additional line for rinsing the system, and the contaminants are easily removed with a simple backwashing.

The system can also be used for: recovery of rinse water from spa swimming pools; recovery and treatment of surface waters; class A wastewater upgrading; cooling water and industrial wastewater treatment (in various industries, e.g. food, fruit and vegetable processing, dairy, fish farms or green-houses).

The technology is part of the area of Eco-innovation, as it significantly reduces the consumption of water and electricity with the use of Advanced materials and tools.

Possessed Quality certification:

-System SOWA has been submitted in the PPO as a PATENT FOR THE INVENTION entitled: "Method and system for purification and recovery of wash water, especially after washing pool filters" P.435356 and as an INDUSTRIAL MODEL entitled: "Wash water recovery system" Wp 29474.

-ATEST by the National Institute of Hygiene

Unique Selling Points:

1. Water saving - recovery of up to 96% of washings that would be sewage in a standard swimming pool circuit, and thanks to the SOWA system, the recovered water gains unmatched purity and quality of swimming pool water;
2. Electricity saving - water returned to the pool has a temperature close to the water in the system (only 10C loss), so we do not waste energy that would have to be used to heat the water supplied from the water supply;

## PRODUCTS:

STC has a long-term experience in the design and construction of water purification systems. Thanks to our interdisciplinary knowledge and approach, we are able to offer tailor-made solutions through the integration of traditional and innovative technologies. Our solutions contemplate different uni-

tary operations such as physico-chemical treatments, plants for the separation and sedimentation of suspended solids, filtration plants, membrane plants (Ultrafiltration, Nanofiltration, Reverse Osmosis, Electrodialysis), evaporation and crystallization plants. STC offers turnkey water treatment plants or integrated technologies designed to have all the advantages of the latest technical and industrial experience. The company combines many years of laboratory activities, developing innovative technologies, with in situ proficiency as plant manufacturer of turnkey water treatment plants. Our activity covers all phases from consulting to feasibility studies, from the LAB tests, to the design of a plant and finally its construction. Furthermore, we carry out the start-up of the plants and offer continuous technical support and training for the Client's personnel.

### COMPANY PROFILE:

STC is an Italian EPCM (Engineering Procurement & Construction Management) company which designs and supplies a full range of plants, services and engineering solutions in the field of batteries recycling and lead production as well as water treatment.

The company was founded in 2001 by a group of young engineers guided by the esteemed Italian metallurgist Prof. Renato Guerriero. It is located in Mesagne (BR) - Italy and currently counts 39 employees.

STC offers complete water and wastewater treatment equipment as well as Plug&Play and tailor-made solutions such as physicochemical treatments, plants for the separation and sedimentation of suspended solids, filtration plants, membrane plants, evaporation and crystallization plants and many others.

The final aim of STC productions is always to enable customers to reduce production costs, increase quality, reduce the environmental footprint and improve the health and safety conditions of the operators. Much of the knowledge held by STC and mainly protected by National and International patents, derives from research and development activities carried out in their laboratory.

Analysis instruments and dosing systems for water treatment. Ready-to-use assemblies for a wide range of applications, from the treatment of process and waste water to the disinfection of swimming pool water, sanitation in the food industry and legionella prevention in DHW circuits.

### COMPANY PROFILE:

STEIEL... SINCE 1973 THE ELECTRONICS WITH PASSION FOR WATER

STEIEL is decades-long experience and a team of specialists, who designs and manufactures measurement instruments and dosing systems for the treatment of all types of water.

This constantly evolving historical reality is now present in more than 30 countries and in several fields, such as wastewater and process water treatment, water conditioning, agri-food and livestock industry, disinfection of swimming pools and sanitization of DHW systems.

In fact, STEIEL is one of the first Italian manufacturers of chlorine dioxide generators, and from more than 10 years has been sanitizing water distribution systems in many public and private facilities, hospitals, hospices and nursing homes, hotels, agri-food industries and farms.

STEIEL is always attentive to the market needs and also synonymous with tailor-made solutions. The customer can count on full technical and commercial support, from the offer definition to the plant start-up, technical training and periodic maintenance, because nothing is left to chance!

Accepting challenges is the key of our success and our philosophy... "Do not ask us to be what we are not, but help us to not remain what we are".

Artificial Intelligence to renewable energy assets.

#### COMPANY PROFILE:

Suncast, a Chilean company, works every day for a more sustainable future. Suncast applies Artificial Intelligence to renewable energy assets. Currently, is working with several international clients in Chile and Mexico, providing services to over 1.3 GW of photovoltaic installed capacity. Suncast, established by a young woman engineer in 2017, has a highly qualified team that developed a Software as a Service Platform and offers two digital solutions to the renewable energy industry: Energy Forecasting and Predictive Maintenance. The Energy Forecasting Service, predicts - through high accuracy models - the power generation of photovoltaic and wind power plants, not only complying with regulation but also maximizing the performance of energy farms. The Predictive Maintenance Service uses models to predict an optimal performance plan for cleaning services of solar panels -- delivering cleaning schedules and frequencies -- reducing unnecessary cleaning and maximizing the energy generation without the need to install additional devices. Suncast is the perfect partner to support decision making the performance and maintenance optimization of renewable energy farms, with the most advanced Machine Learning and Artificial Intelligence technology.

TCS Utilities overview and offerings and IGNO product for AI and automation

## COMPANY PROFILE:

Tata Consultancy Services (TCS) is an IT services, consulting and business solutions organization that has been partnering with world's largest businesses in their transformation journeys for over 50 years. TCS offers a consulting-led, cognitive powered, integrated portfolio of business, technology and engineering services and solutions. This is delivered through its unique Location TM Independent Agile delivery model, recognized as a benchmark of excellence in software development.

As a part of Tata group, India's largest multinational business group, TCS has major businesses spanning across Europe, North America, APAC, and MEA. With over 448,000 of the world's best-trained consultants in 46 countries, TCS generated consolidated revenues of US \$23 billion in FY 2021. TCS has 12000+ associates dedicated to Utilities with 20+ years in business and is partner to 100+ utilities across the globe.

The theme of TCS for this year is: Building on Belief.

In relation to WETEX 2020 theme 'At the forefront of sustainability' - TCS' proactive stance on climate change and award-winning work with communities across the world have earned it a place in leading sustainability indices such as the MSCI Global Sustainability Index and the FTSE4Good Emerging Index.

TCS Innovation Labs develop transformative, research-based solutions for customer with over 19 labs worldwide fueled by advanced and emerging technology trends and scientific research. A dedicated R&I MEA Unit identifies the need of regional market and localizes TCS' global innovation pillars. The unit has also established a strong local ecosystem of accelerators, incubators, emerging regional technology companies, and academia.

66kV up to 500kV Power Cable & Accessories

## COMPANY PROFILE:

TBEA Shandong Luneng Taishan Cable Co., Ltd. (hereinafter referred to as TBEA Shandong) founded in 1950 and formerly known as Shandong Cable Factory, is the core backbone enterprise of TBEA's power transmission and transformation industry, centennial brand cultivation enterprise in Shandong province, national high-tech enterprise and single champion demonstration enterprise of national manufacturing industry. TBEA Shandong inherits 70 years of wire and cable manufacturing and ser-

vice experience and is committed to providing global customers with green, technological, energy-saving and environmentally friendly high-quality products and reliable integrated power system solutions.

TBEA Shandong is a national large-scale wire and cable research & development and manufacturing export base, a leading company in the domestic wire and cable industry, and one of the earliest enterprises specializing in the development of 110kV, 220kV HV and 500kV UHV products in China. In the domestic market our 110kV cables are the first one to pass national appraisal, 220kV cables are first put into operation in the cable industry. Moreover, TBEA Shandong is the only company which can supply 500kV cable+ accessory+construction, operation and maintenance integration services in China.

TBEA Shandong has the ability to R&D, manufacture and test the a full range of wire and cable products such as 750kV and below power cables, cable accessories, large-section overhead conductors, special cables, and civilian wires. We have world-leading 750kV UHV cables,  $\pm 1100$ kV UHV AC and DC large-section wire manufacturing equipment, also have an industry-leading national UHV cable engineering test center, an academican workstation of Shandong Province and a key engineering laboratory. Additionally we have an open innovation platform that combines production, teaching and researching together with key domestic research institutes. TBEA Shandong has a strong scientific research team with more than 20 high-level professional and technical personnel, including the "National Thousand Talents Plan", industry experts, chief technicians, etc., and technical personnel with engineers or above account for 40%. Possessing 43 national patents and 5 core invention patents, we have participated in the formulation of 22 national standards and industry standards, won the first prize of the China Machinery Industry Federation Science and Technology Award, and rated as one of the top-10 most competitive enterprise in Chinese cable industry. The "TBEA" brand has won such honors as China Well-known Trademark, China Famous Brand Product, Shandong Famous Trademark, etc..

TBEA Shandong has obvious advantages in integration of HV cable systems, and has achieved full coverage from exploration, design, construction, installation, testing, commissioning, operation, maintenance and training and can complete independently of 500kV and below turnkey project including "Cable + Cable accessory + Construction + Completion Test + Operation & Maintenance". We have successively completed domestic 500kV projects such as Xinyuan Aluminum 700MW Unit project in Chipping City, Jixi Energy Storage Hydropower Station in Anhui Province, Lidi Hydropower Station in Lancangjiang River, Gujiao Power Plant Project in Shanxi Province, also international 500kV projects such as Kaluma Hydropower Station in Uganda, Nuclear Power Station in Karachi, Pakistan, and more than 20 66-500kV power engineering projects such as 220kV power projects in New Delhi, India, 132kV power plants in Kuwait, 66kV and 220kV power projects in Nairobi, Kenya, and 132kV transmission lines in Bolivia. While equipping China, We also shares China's advanced power construction experience with the world.

As a national energy-saving power transmission and transformation industry leader, TBEA Shandong's products and services have been widely trusted and recognized by customers at home and abroad. Our products and services are not only provided for national major projects such as the reconstruction of Tiananmen Square, the Three Gorges Water Conservancy Project, the Qinghai-Tibet Railway, the Beijing Olympics, the Winter Olympics, the Shanghai World Expo, the Guangzhou Asian Games, and UHV AC and DC transmission projects etc.. but also have been exported to more than

80 countries and regions, including Kuwait, India, Kenya, Indonesia, Bangladesh, Angola, Pakistan, Vietnam, France, Brazil, Russia, Australia, Singapore, Nigeria etc..

we will adhere to the sacred mission of "Equip China, Powering the world", further promote system integration and intelligent manufacturing, improve cable basic research and technological innovation, strengthen and expand the main cable manufacturing industry, and exert HV Cable + accessories + construction integration advantages, strive to build China's first HV cable brand, ensure the country's major energy security, achieve major domestic technology and equipment to highlight the mission and responsibility of the national industry and its backbone, and better serve the the development of China and the world economy!

Water Tanks; Plants For Waste; Plants for Rainwater Haresting; Below Ground Tanks; Tanks for Chemical Products

### COMPANY PROFILE:

Since 1973, Telcom Spa stands out for the development of innovative products realized in thermo-plastic material that contribute to improving life quality of those using them in different ways, by joining Italian design, solidity and functionality.

The tanks of Aquarius line produced by Telcom, have been designed after years of in-depth study to satisfy several needs of containment of water or other chemical products for the industry. They are synonymous with quality and reliability and released in a great variety of formats, from 5 to 50.000 liters.

**PRODUCTS:**

Drinkable Air Atmospheric Water Generator (AWG) – The water is produced by converting moisture in the air to water and is further purified therefore it contains no contaminants such as dust, particulate, bacteria or other microorganisms Products being displayed are: i. C3 The C3 is an affordable, compact, attractive and reliable device that operates quietly to make, chill and dispense water of distinctive quality. Simply connect the unit to a power source and the C3 begins producing up to 12 liters of pure water per day. Its ozone purification process and air and carbon filters and mineral cartridge ensure the purest, best tasting water you will find. It weighs about 22kg and is best suited for domestic, hospitality and office use ii. C8 A self-standing portable unit generating 40 l/day and storage capacity of 26 liters. The C8 will maintain contaminate-free cold water using our ozone purification process, has an electrostatic-antimicrobial air filter and has both a granulated carbon filter and a mineral cartridge to add nutrients back into the water. It is about 100 cm high and is designed for both indoor and outdoor use. Both systems work well at an ambient temperature of 23 degree C and relative humidity above 45% The Drinkable Air purification systems use Ozone and GAC filters to ensure 100% pure water at all times.

**COMPANY PROFILE:**

Terrafic Energy is a UAE-based organization focusing on Energy and Water - two high impact sectors of the region. We are committed to the sustainable generation and conservation of our natural resources and to empower people to lead a sustainable life using novel technologies.

With an overarching goal of mitigating climate change and preserving the earth's natural environment, we work at the grass-root levels to make innovative technologies available to every person and organization. Our solutions not only bring you closer to nature, but they also integrate advanced technologies that harness the unlimited energy contained in natural resources like the sun, wind and water.

Therefore, to realize the green future that we have envisioned, we urge each and everyone of you to make small changes in your daily life because preserving our Earth is the responsibility of each one of us.

**Our Approach**

We enable an easy transition from the current energy intensive and unsustainable lifestyle to a more responsible and environmentally secure life through mindful use of energy and water. Our simple 4-step approach is

1. Generate your own clean water
2. Conserve water

3. Generate your own clean energy
4. Conserve energy

We are the exclusive partners and distributors in the Middle East for a multitude of internationally patented technologies in the renewable energy and water domain. We meticulously select our products with the aim of bringing value to our users as well as those products that will help the desert region survive and thrive the harsh climatic conditions without impacting the natural environment.

Our products in each category are

1. Generate water - Drinkable Air, Atmospheric water generator
2. Conserve water - water efficient shower heads, self-standing hand wash units and low-flow water fixtures and fittings
3. Generate electricity - turnkey solar energy solutions for residential and commercial use
4. Conserve electricity - Heat reflective paints, Adiabatic coolers

Benefits

- Monthly Savings - Guaranteed savings on DEWA water and electricity bills
- Water and Energy security - Become an independent producer and reduce dependence on the grid
- Accessibility - Have abundant supply of clean water and electricity even at remote locations
- Efficiency - Abundant sunshine and high humidity ensure uninterrupted supply of solar power and fresh water
- Improved Health - Pollution-free air, water and neighborhoods lead to a better quality of life and well-being
- Reduced Waste - The per capita energy and bottled water consumption is reduced drastically leading to less waste generation per person

### PRODUCTS:

Energy is actually one of the main costs in a company. Cloven is born from this awareness and consequently it allows companies to control their energy consumption, thus reducing costs in the bill. Cloven is a real time monitoring and control system that allows the acquisition and supervision of plant's energy consumption and main operating parameters. The detailed knowledge of these aspects leads

the identification of the critical areas of intervention, maximizing the effectiveness of the savings actions. Trigenia assists companies in the design and configuration of the measuring field, in software development and release, and finally in the maintenance of the entire system.

### COMPANY PROFILE:

Trigenia's goal is building new production methods and successfully accompany companies in open innovation processes, energy efficiency and industrial innovation 4.0, through the implementation of new digital technologies.

Trigenia is an Enertech Company, founded in 2007 by the union of professionals with experience in the fields of finance, digital and energy. able to customize solutions for each individual company, basing its business model on research, development and innovation.

Water Valve - Butterfly valves, Knife gate valve, swing check valve, spigot valve, Gate valve, Remote control float valve, Double flanged butterfly valve.

### COMPANY PROFILE:

TYNE GULF INDUSTRIAL COMPANY is established in the Kingdom of Saudi Arabia since 2018 having 3 years of manufacturing experience meeting the growing demand for quality valves in the GCC construction industry. Major water industry products such as gate, butterfly and check valves are being manufactured here. TYNE GULF is designed to provide efficient and reliable services in water industry with the widest variety of valves

Tyne Gulf is committed to continually raise the benchmark for innovative design and quality through international accreditations under ISO, SASO etc. for manufacturing and WRAS recognition for potable water product compliance. Our extensive range of valves and accessories strictly comply with European and American standards.

We are committed to support the construction and development of GCC by supplying high quality water valves that sets the industry standard. We understand the value of continual improvement and commitment to our most valuable asset - our customers. We will strive to be the best in every aspects of our business by utilizing our core competencies, fostering a culture of trust, teamwork and responsibility.

Electrochlorination System For Water Disinfection And Waste Water Treatment.

**COMPANY PROFILE:**

ULTRANODE Inc Canada has been established since 2009 in Ottawa Canada. ULTRANODE is a well-known manufacturer of SAFE and SOLID Electro-Chlorination (On site sodium hypochlorite / NaOCl generator for water disinfection) packages and plants to disinfect the water (both for seawater and brine Electro chlorination). ULTRANODE manufactures high-tech products in the field of water and energy and also is performing Engineering, Procurement, Construction and, Commissioning (EPCC) projects serving the following sectors:

Refineries and Petrochemical Industry

Power Stations

Off-Shore Platforms

Desalination Plants

Potable, Wastewater Disinfection

Swimming Pools, Dams, Water Features

Industrial / Municipal / Commercial / Agricultural/ Fishery

ULTRANODE are manufacturers of Mixed Metal Oxide (MMO) anodes which is the heart of Electrochlorination system. This is based on our advanced high-tech NANO technology coating which minimizes power consumption and increases efficient output having the highest productivity, maximizes the life time where the price is in the competitive edge.

ULTRANODE products can be custom designed according to client's requirements where all electrolyzer cell assembly and anode manufacturing takes place at our facilities in Canada as well as the middle east. Our renowned ElectroChlorinators have been providing environmentally safe onsite water disinfection for a variety of applications within a wide range of capacities operating with seawater or brine in various sectors.

ULTRANODE offers wide range of services including; revamping, O&M, refurbishment and recoating of electrodes, electrode and electrolyzer cells replacement equivalent to other OEM electrolyzer cells as well as chlorine gas-based systems replacement.

Butterfly Valves, Gate Valves

**COMPANY PROFILE:**

Profile (not more than 250 words) Valvometal Middle East Valves Factory LLC (VME) is a UAE based Industrial Valves Manufacturer located in KIZAD, Abu Dhabi. We design, manufacture and supply Industrial valves serving various industry verticals with the focus on water distribution / transmission, wastewater, desalination, district Cooling and process industry.

We Specialize in manufacturing the below products in our state-of-art production facility.

- Gate valves
- Butterfly valves
- Check valves
- Air release valves
- Ball Valves
- Mechanical Fittings

Our facility has complete in-house CNC machining, Shot Blasting, Fusion Bond Epoxy Coating (FBE), assembly, testing and painting facilities under one roof with ISO 9001 and ICV certification.

We use WRAS/NSF approved components and coating making our valves suitable for Potable water distribution systems.

VME offers diversified valves packages in a variety of alloys, trims, configurations, sizes and pressure classes, from general to severe service applications.

Our engineering and manufacturing team extends its complete assistance and support to End users. We are committed to provide high quality and cost-effective products along with best suitable engineering solutions & support to help our customers achieve their operational efficiency.

Our valves have exclusive design, offering high degree of interchangeability of their components, thus reducing the inventory cost of spare parts. We believe in continuous improvement & product innovation to keep ourselves competent and best in class.

### PRODUCTS:

VEGA develops and manufactures Level and Pressure Sensors. The range of instruments covers: Radar, Ultrasonic, Hydrostatic sensor, Guided-wave Radar, Capacitance, Conductive probe, Pressure transmitter, Differential pressure transmitters (DPT), Vibrating fork, Radiation-based sensors...

### COMPANY PROFILE:

The German company VEGA, that has been developing sensors for radar level measurement for 30 years, has played a key role in the Water & Waste water sector. When, just a few years ago, it introduced VEGAPULS sensors with 80-GHz operating frequency, another new era began. Thanks to this technical breakthrough VEGA makes the measuring process much more reliable and easier. Approved by European government-based companies the radar ensure reliable measurement for WWTP inlet measurement, lift stations, overflow chambers, etc... Many measuring tasks that had once been considered impossible became commonplace thanks to this technology.

**PRODUCTS:**

Innovative Environmental Technology. The use of ultrasonic disintegration leads to significant cost reduction within water treatment plants of all kinds. A new generation of ultrasound technology is made available with the DesiUS (Disintegration Ultrasound System) internationally recognized and approved. Due to its robust and specific design, the DesiUS has advantages over its competitors due to its reliability, cost and energy efficiency. The increased gas yield and sludge reduction contribute significantly to the improvement of the CO<sub>2</sub> - and energy efficiency balance on WWTPs. Advantages: very high efficiency – 50 % and more savings compared to other disintegration systems, high degree of operational reliability, optimized adaption towards the specific requirements, low space requirement through small and compact construction, Plug & Play, quick pay back, clogging free, continuous process, treatment of substrates up to 15 % DM possible, increased dewaterability, reduced viscosity.

**COMPANY PROFILE:**

MORE AS A PARTNER

A company with history

Weber Entec GmbH & Co. KG is a subsidiary of Weber Ultrasonics AG, one of the world's leading manufacturers of ultrasound components and ultrasonic welding equipment.

Weber Entec concentrates on systems engineering and applications using ultrasound in the field of environmental engineering, especially ultrasonic treatment of biogenic materials, known as disintegration. Because of its broad range of services, the company is a one-stop source for manufacturing, plant construction, sales, system analysis and process optimisation.

Over many years of collaboration with the Fraunhofer Institute, IKTS division, Weber Ultrasonics has developed a sewage sludge disintegration process which is superior in crucial technical respects to currently available processes, and which can therefore be implemented universally and above all more efficiently in terms of costs and energy. The approach of the scientists of the Fraunhofer Institute, proven over many years of basic research, in combination with the extensive long-term industrial experience of Weber Ultrasonics AG, finally resulted in a process which is now available as a market-ready industrial product, in the form of the DesiUS.

## COMPANY PROFILE:

WILO is one of the world's leading premium suppliers of pumps and pump systems for building services, water management, and the industrial sector. Founded in Dortmund in 1872 as a factory for copper and brass goods, Wilo has evolved from being a local specialist to a global player in the course of its long and successful history. We are well-acquainted with questions that will shape our future and we develop technologies that provide answers. Global megatrends are having a profound and lasting impact on our lives. As we address these trends, we concentrate on globalisation, urbanisation, climate change, energy scarcity, water shortage as well as technological advances and digitalization-important issues for your day-to-day work. Which makes them important to us, too. Every day, around 8,000 employees worldwide work to make that claim a reality. At 18 production sites in more than 60 subsidiaries in 60 countries. The result: pioneering new products, systems and services.

Amongst these megatrends, technological advances and digitalisation are two prime topics. Digitalisation is having a fundamental impact on consumer demands, production methods, workflows and production routes. We recognize the opportunities that digitalisation brings and leverage them to make the future a better place and enhance people's daily lives. In the process, we have emerged as a digital pioneer in the industry. We do it all with a precise objective: through the intelligent networking of people, products, services, factories and machines, we effectively harness the potential of digitalisation to create smart solutions. Making life easier for our customers and the future a better place.

Civil, MEP & Fire Fighting Contracting

## COMPANY PROFILE:

Yukon International Contracting LLC is proud to be a leading provider of EPC and design and engineering services in the fields of electrical, plumbing, firefighting, HVAC systems and oil and gas across UAE. Our solutions are mostly engaged in the business of Mechanical, Electrical and Plumbing (MEP) turnkey project contracting, which (MEP) are a significant component of the construction supply chain. The MEP sector is evolving in an integrated service delivery pattern, which encompasses everything from design and procurement through to supply, installation, integration, testing and commissioning. In addition, the focus of MEP services is also shifting to encompass operation and maintenance. Its solution includes turnkey electro mechanical works starting from the engineering design, value engineering, construction management, erection, testing, commissioning, operation and maintenance.

Our Company is approved and certified and accredited under the management system as per ISO

9001:2015; ISO 14001:2015; ISO 45001:2018 Also the company is approved by Dubai Civil Defense (DCD) to carry out the specialized firefighting works in Dubai.

## MAIN SEMINARS AGENDA "THE FOREFRONT OF SUSTAINABILITY"

Day 1 - Tuesday 5<sup>th</sup> October 2021

10:00 am - 11:20 am

WETEX & DUBAI SOLAR SHOW OPENING

METITO

11:30 am - 11:50 pm

Seawater Desalination Powered by  
Unconventional Energy

Mr. Assem Zakaria

SIEMENS

12:00 pm - 12:20 pm

Smart Energy for a Sustainable  
Future

Mr. Franco Atassi

12:30 pm - 12:50 pm

Renewable Energy

Dr. Andrea Lovato

SIEMENS  
energy

01:15 pm - 01:35 pm

Resilient Grids & Decarbonization

Mr. Hasan Nasir  
Mr. Younes El-Jazouli

01:45 pm - 02:05 pm

Open Energy: A Paradigm Shift in  
Achieving the NetZero

Mr. Vikesh Sachdeva

DIEHL  
Metering

02:15 pm - 02:35 pm

Metering Solutions

Mr. Jairo Rojas

SAP

02:45 pm - 03:05 pm

Augmented Intelligence in Asset  
Management

Mr. Rui de Sousa

Itron

03:15 pm - 03:35 pm

DEWA Smart Grid Platform –  
A Success Story!

Mr. Jonathan Tatton

Honeywell

03:45 pm - 04:05 pm

Smart Metering in Smart City

Mr. Ali Mouslmani

DOOSAN Doosan Babcock

04:15 pm - 04:35 pm

Digital Damage Assessment –  
Innovation in Asset Lifecycle  
Management

Mr. Jamie Morris

4SiGHT

04:45 pm - 05:05 pm

AI Boost - Optimal Electricity Cost  
& Active Safety

Mr. Rizwan Razaq

GAMA

05:15 pm - 05:35 pm

Emerging Physical Security System  
Technologies in Utility  
Infrastructure

Mr. Jithin Prakash

## MAIN SEMINARS AGENDA "THE FOREFRONT OF SUSTAINABILITY"

Day 2 - Wednesday 6<sup>th</sup> October 2021

10:00 am – 10:20 am

**Pushing the Boundaries on Sustainability with Innovations in Digitalization & AI**  
Mr. Ahmad Abuothman

10:30 am – 10:50 am

**Decarbonization in the Future Energy Sector: Hydrogen Capabilities Retrofit**  
Mr. Aymen Lazreg

11:00 am – 11:20 am

**Disrupting / Emerging / Innovative Technologies in Energy, Water and Environment**  
Dr. Bart Boesmans

11:30 am - 11:50 pm

**Sustainable initiatives for a Smart City**  
Eng. Muammar Al Katheeri

12:00 pm – 12:20 pm

**Sharjah Waste to Energy Plant, A Success Story**  
Ms. Alya Al Naqbi

12:30 pm – 12:50 pm

**ENOC eLink**  
Mr. Saeed Amiri

01:15 pm – 02:05 pm

**Panel: Post Covid19 Innovation Outlook**

**Panelists:**  
Mr. Mohammad Bin Sulaiman – Moro Hub  
Mr. Walid Yehia - DELL Technologies/Intel

Mr. Fayez Ibbini – Alpha Data  
Mr. Shukri Eid - Cisco

**Moderator:** Ms. Rula Tarawneh - CNBC

02:15 pm – 02:35 pm

**Dynamic Reactive Power Compensation (DRPC)**  
Mr. Conny Wahlberg  
Mr. Mikael Halonen

02:45 pm – 03:05 pm

**Sustainability Projects for Power, Desalination & Water Transmission Plants**  
Mr. Emiliano Conti

03:15 pm – 03:35 pm

**Applicable Technologies for Centralized Industrial Effluent Treatment**  
Mr. Mohamed Salah

03:45 pm – 04:05 pm

**Promoting Best Practice in terms of Process, Tools & Equipment's in Overhead LIVE LINE Works**  
Mr. Praveen Kumar

04:15 pm – 04:35 pm

**Technical Choice Throughout the Full-life Cycle of PV Power Plant**  
Ms. Claire Wansi Zheng

04:45 pm – 05:05 pm

**Hydrogen as a Fuel & its Adoption into our Daily Lives**  
Mr. Sagar Mirchandani

05:15 pm – 05:35 pm

**Latest Solutions in Renewable Marine Energy Solutions**  
Mr. Orkun Arikan

## MAIN SEMINARS AGENDA "THE FOREFRONT OF SUSTAINABILITY"

Day 3 - Thursday 7<sup>th</sup> October 2021

**SIEMENS**

10:00 am – 10:20 am

**Open Innovation for Smart Cities -  
MindSphere Future World Series**

Mr. Afzal Mohammed

10:30 am – 10:50 am

**ENOC Service Station of the  
Future**

Ms. Fatma Saleh

11:10 am – 11:20 am

**Environment-Friendly  
Lead Sheath Alternative  
for 132 kV Cables**

Mr. Mohamad El Chmouri

**HITACHI ABB**

11:30 am - 11:50 pm

**Learn Prognostics & Predictive  
Analytics for Transformers & Get  
Introduced to our Forthcoming  
Transformer Technology, Compactcool**  
Mr. Mohamed El-Fayoumy Mr. Yazan Smadi

12:00 pm - 12:20 pm

**Composite Pipes: A Greener &  
Sustainable Solution for Water  
Distribution Networks**

Mr. Jad Daoud

12:30 pm - 12:50 pm

**The Digital Utility: Creating High  
Performance Enterprises**

Mr. Walid Abou Chacra

01:15 pm - 01:35 pm

**Changing the Future of Water**

Mr. Gavin Van Tonder

**EVOCARGO**

01:45 pm - 02:05 pm

**Autonomous logistics.NOW**

EVOCARGO

Mr. Andrei Bolshakov

**دوخاب Ducab**

02:15 pm - 02:35 pm

**Long Term-Pre-Qualification of EHV  
Cable including High Temperature  
loading to Simulate Emergency  
Operation Capability**  
Eng. Ahmed Mohamed

02:45 pm - 03:05 pm

**HYBERMACH – Hybrid Energy  
Machine**

Mr. Jerin Andrew Thomas  
Mr. Nishant Cherian Babu

03:15 pm - 03:35 pm

**Network Intelligence for Active  
Network Management**

Mr. Mohammad Afani

03:45 pm - 04:05 pm

**Energy Efficiency in Food Sector**  
Prof. Ahmed El Tigani Abdelrahim

04:15 pm - 04:35 pm

**Laminated Aluminium Tape the  
Preferable Choice for Radial Water  
Tightness**

Mr. Altaf Ahmed

**intel JUMBO**

04:45 pm - 05:05 pm

**The Role of AI & Technology in  
Energy & Environment**

Mr. Adib Rajji

**MAGALDI**  
Responsible energy storage

05:15 pm - 05:35 pm

**Thermal Energy Storage: A Key  
Enabler for the Full Transition to  
Renewables**

Mr. Massimiliano Masi

## MAIN SEMINARS AGENDA "THE FOREFRONT OF SUSTAINABILITY"

### MAIN SEMINARS LOCATION MAP

## أجندة الندوات الرئيسية "في طليعة الاستدامة"

اليوم الأول - الثلاثاء 5 أكتوبر 2021

10:00 صباحًا - 11:20 صباحًا

الافتتاح وزيارة المعرض

12:30 مساءً - 12:50 مساءً

الطاقة المتجددة  
د. أندريا لوفاتو

SIEMENS

12:00 مساءً - 12:20 مساءً

طاقة ذكية لمستقبل مستدام  
السيد. فرانك الاتاسي

11:30 صباحًا - 11:50 صباحًا

تحلية مياه البحر بالطاقة  
غير التقليدية  
السيد. عاصم زكريا

02:15 مساءً - 02:35 مساءً

حلول العدادات  
السيد. جايرو روجاس

01:45 مساءً - 02:05 مساءً

الطاقة المفتوحة: نقلة نوعية في تحقيق  
"صفرية الطاقة"  
السيد. فيكيش ساشديفا

01:15 مساءً - 01:35 مساءً

الشبكات المرنة وإزالة الكربون  
السيد. حسن ناصر  
السيد. يونس الجزولي

Honeywell

03:45 مساءً - 04:05 مساءً

العدادات الذكية في المدينة الذكية  
السيد. علي مسلماني

Itron

03:15 مساءً - 03:35 مساءً

منصة الشبكة الذكية لهيئة كهرباء ومياه دبي  
- قصة نجاح!  
السيد. جوناثان تاتون

02:45 مساءً - 03:05 مساءً

الذكاء المعزز في إدارة الأصول  
السيد. روي دي سوسا

GAMA

05:15 مساءً - 05:35 مساءً

التقنيات الناشئة لأنظمة الأمن المادي في  
البنية التحتية للمؤسسات الخدمانية  
السيد. جيثين براكاش

04:45 مساءً - 05:05 مساءً

تعزيز الذكاء الاصطناعي - التكلفة المثلى  
لل كهرباء والسلامة النشطة  
السيد. رضوان رزاق

04:15 مساءً - 04:35 مساءً

تقييم الضرر الرقمي - الابتكار في إدارة دورة  
حياة الأصول  
السيد. جيمي موريس

## أجندة الندوات الرئيسية "في طليعة الاستدامة"

اليوم الثاني - الأربعاء 6 أكتوبر 2021

11:00 صباحًا - 11:20 صباحًا

التقنيات الإحلالية / الناشئة / المبتكرة في  
الطاقة والمياه والبيئة  
د. بارت بويسمانس

10:30 صباحًا - 10:50 صباحًا

إزالة الكربون في قطاع طاقة المستقبل: إعادة  
تأهيل قدرات الهيدروجين  
السيد. أيمن الأزرق

10:00 صباحًا - 10:20 صباحًا

تعزيز الاستدامة في ظل الابتكارات في مجال  
الرقمنة والذكاء الاصطناعي  
السيد. أحمد أبو عثمان

12:30 مساءً - 12:50 مساءً

إينوك (eLink)  
السيد. سعيد أميري

12:00 مساءً - 12:20 مساءً

محطة الشارقة لتحويل النفايات إلى طاقة -  
قصة نجاح  
السيدة. علياء التقبي

11:30 صباحًا - 11:50 صباحًا

المبادرات المستدامة للمدينة الذكية  
م. معمر الكثيري

02:15 مساءً - 02:35 مساءً

التعويض الديناميكي للقدرة غير الفعالة  
(DRPC)  
السيد. كوني والبرغ السيد. ميكائيل هالونين

01:15 مساءً - 02:05 مساءً

جلسة نقاشية: نظرة على الابتكار لمرحلة ما بعد "كوفيد-19"

المتحدثون:  
السيد. محمد بن سليمان - مورو  
السيد. وليد يحيى - تقنيات ديل  
السيد. فايز العبيني - الفا داتا  
السيد. شكري عيد - سيسكو  
المحاور: السيدة. زلى الطراونة - CNBC

03:45 مساءً - 04:05 مساءً

الترويج لأفضل الممارسات في العمليات والأدوات  
والمعدات في أعمال خطوط الكهرباء الحيثة  
السيد. براقين كومار

03:15 مساءً - 03:35 مساءً

التقنيات القابلة للتطبيق  
للمعالجة المركزية للنفايات الصناعية السائلة  
السيد. محمد صلاح

02:45 مساءً - 03:05 مساءً

مشاريع الاستدامة لمحطات الطاقة وتحتلية  
ونقل المياه  
السيد. اميليانو كونتي

05:15 مساءً - 05:35 مساءً

أحدث حلول الطاقة البحرية المتجددة  
السيد. أوركون أريكان

04:45 مساءً - 05:05 مساءً

الهيدروجين كوقود واعتماده في حياتنا  
اليومية  
السيد. ساغار ميرشنداني

04:15 مساءً - 04:35 مساءً

الاختبار الفني طوال دورة الحياة الكاملة  
لمحطة الطاقة الشمسية الكهروضوئية  
السيدة. كلير وانسي زينج

## أجندة الندوات الرئيسية "في طليعة الاستدامة"

اليوم الثالث - الخميس 7 أكتوبر 2021

11:00 صباحاً - 11:20 صباحاً

بديل غمد الرصاص الصديق للبيئة  
لكابلات 132 كيلو فولت  
السيد. محمد الشموري

10:30 صباحاً - 10:50 صباحاً

محطة خدمة اينوك للمستقبل  
السيدة. فاطمة صالح

**SIEMENS**

10:00 صباحاً - 10:20 صباحاً

الابتكار المفتوح للمدن الذكية - سلسلة  
المستقبل لعالم (MindSphere)  
السيد. أفضل محمد

12:30 مساءً - 12:50 مساءً

المنشأة الرقمية: إنشاء مؤسسات عالية  
الأداء  
السيد. وليد ابوشقرا

12:00 مساءً - 12:20 مساءً

الأنابيب المركبة: حل أكثر استدامة لشبكات  
توزيع المياه  
السيد. جاد داود

**HITACHI ABB**

11:30 صباحاً - 11:50 صباحاً

تعلم تحليل وتوقع أداء المحولات الكهربائية وتعرف  
على تقنية المحولات القادمة، Compactcool  
السيد. محمد الفيومي  
السيد. زين الصمادي

**Ducab** دوكاب

02:15 مساءً - 02:35 مساءً

التأهيل المسبق طويل الأجل لكابل الجهد العالي  
جداً بما في ذلك التحميل عالي الحرارة لمحاكاة  
قدرة التشغيل في حالات الطوارئ  
م. احمد محمد

**EVOCARGO**

01:45 مساءً - 02:05 مساءً

الخدمات اللوجستية المستقلة.الآن  
**EVOCARGO**  
السيد. اندريه بولشاكوف

01:15 مساءً - 01:35 مساءً

تغيير مستقبل المياه  
السيد. جافين فان توندر

03:45 مساءً - 04:05 مساءً

كفاءة الطاقة في قطاع الغذاء  
أ.د. أحمد التجاني عبدالرحيم

03:15 مساءً - 03:35 مساءً

الشبكات الذكية وإدارتها النشطة  
السيد. محمد عفاني

02:45 مساءً - 03:05 مساءً

**HYBERMACH - آلة الطاقة الهجينة**  
السيد. جيرين أندريو توماس  
السيد. نيشانت شيربان بابو

05:15 مساءً - 05:35 مساءً

تخزين الطاقة الحرارية: عامل تمكين رئيسي  
لانتقال الكامل إلى مصادر الطاقة المتجددة  
السيد. ماسيميلىانو ماسي

04:45 مساءً - 05:05 مساءً

دور الذكاء الاصطناعي والتكنولوجيا في الطاقة  
والبيئة  
السيد. أديب الرجعي

04:15 مساءً - 04:35 مساءً

شريط الألمنيوم الرقائقي الخيار الأمثل  
لكابلات الممانعة للماء  
السيد. أطاف أحمد
